SABAH 2022

Pemakluman:

DOSM sedang menjalankan Banci Ekonomi pada tahun 2023. DOSM amat menghargai kerjasama daripada responden dalam memberikan maklumat kepada DOSM serta menjayakan banci ini. Sila layari www.dosm.gov.my untuk maklumat lanjut.

DOSM telah melancarkan OpenDOSM NextGen sebagai medium yang menyediakan katalog data dan visualisasi bagi memudahkan pengguna menganalisis pelbagai data. OpenDOSM NextGen ialah platform perkongsian data sumber terbuka dan boleh diakses melalui portal <https://open.dosm.gov.my>.

Kerajaan Malaysia telah mengisytiharkan Hari Statistik Negara (MyStats Day) pada 20 Oktober setiap tahun. Tema sambutan MyStats Day adalah “*Connecting the World with Data We Can Trust*”.

Announcement:

DOSM is conducting the Economic Census in 2023. DOSM greatly appreciates the cooperation of respondents in providing information and ensuring the success of this census. Please visit www.dosm.gov.my for more information.

DOSM has launched OpenDOSM NextGen as a medium that provides a catalogue of data and visualisation to facilitate users in analysing various data. OpenDOSM NextGen is an open source data sharing platform and accessible through <https://open.dosm.gov.my> portal.

*Government of Malaysia has declared National Statistics Day (MyStats Day) on October 20 each year. MyStats Day theme is “*Connecting the World with Data We Can Trust*”.*

KATA PENGANTAR

Laporan Survei Perbelanjaan Isi Rumah, 2022 diterbitkan oleh Jabatan Perangkaan Malaysia (DOSM) yang membentangkan statistik perbelanjaan penggunaan isi rumah meliputi 13 Kumpulan Utama barang dan perkhidmatan. Pengelasan Kumpulan Utama ini adalah berdasarkan *Classification of Individual Consumption According to Purpose 2018 (COICOP 2018)* yang diterbitkan oleh *United Nations Statistics Division (UNSD)*. Statistik berkaitan perbelanjaan yang diterbitkan dalam laporan ini adalah berdasarkan konsep dan garis panduan *System of National Accounts 2008* oleh *United Nations* dan *Framework for Statistics on the Distribution of Household Income, Consumption and Wealth, 2013* yang diterbitkan oleh *Organisation for Economic Co-operation and Development (OECD)*.

Statistik daripada laporan ini merupakan maklumat penting yang digunakan oleh agensi kerajaan sebagai input dalam perancangan, pembentukan dan pemantauan pelan pembangunan negara. Statistik ini juga penting bagi tujuan pengemaskinian wajaran dan penentuan item dalam bakul barang dan perkhidmatan bagi penyusunan Indeks Harga Pengguna Malaysia. Penyusunan statistik ini juga merupakan sumber rujukan bagi ahli ekonomi, ahli akademik, pihak swasta dan individu bagi tujuan penyelidikan dan penganalisaan yang lebih terperinci.

Laporan ini mengandungi tiga bahagian utama. Bahagian pertama memaparkan penemuan utama dan ringkasan penemuan. Bahagian kedua pula menunjukkan statistik terperinci seperti perbelanjaan penggunaan isi rumah mengikut ciri-ciri demografi dan kumpulan utama perbelanjaan. Sementara itu, bahagian ketiga menerangkan aspek teknikal seperti konsep, definisi dan metodologi survei bagi memudahkan pengguna memahami statistik yang diterbitkan.

DOSM merakamkan setinggi-tinggi penghargaan kepada semua pihak yang telah menyumbang secara langsung dan tidak langsung dalam merealisasikan penerbitan ini. Setiap maklum balas dan cadangan daripada semua pihak untuk tujuan penambahbaikan laporan ini pada masa akan datang amat dihargai.

DATO' SRI DR. MOHD UZIR MAHIDIN

PREFACE

The Household Expenditure Survey Report, 2022 is published by the Department of Statistics Malaysia (DOSM) which presents statistics on household consumption expenditure encompassing 13 Main Groups of goods and services. The classification of these Main Groups is based on the Classification of Individual Consumption According to Purpose 2018 (COICOP 2018), which is published by the United Nations Statistics Division (UNSD). The statistics on expenditure published in this report are based on the concepts and guidelines of the System of National Accounts 2008 by the United Nations and Framework for Statistics on the Distribution of Household Income, Consumption and Wealth, 2013 by the Organisation for Economic Co-operation and Development (OECD).

Statistics from this report provide pertinent information used by government agencies as input in the planning, formation and monitoring of national development plans. These statistics are also important for the purpose of updating the weights and to identify the items in the basket of goods and services for the compilation of the Consumer Price Index Malaysia. The compilation of these statistics also serves as reference source for economists, academicians, private sectors and individuals for more detailed research and analysis purposes.

This report consists of three main parts. The first part presents the main findings and a summary of the findings. The second part shows detailed statistics such as household consumption expenditure by demographic characteristics and main group of expenditure. Meanwhile, the third part describes technical aspects such as concepts, definition and survey methodology to facilitate users to better understand the published statistics.

DOSM gratefully acknowledges the cooperation rendered by all parties who have contributed directly and indirectly in realising this publication. Every feedback and suggestions from all parties towards improving this report in the future are highly appreciated.

DATO' SRI DR. MOHD UZIR MAHIDIN

Chief Statistician Malaysia

Fresh vegetables

Fresh fish

Food away from home

A. PENGENALAN

Pandemik COVID-19 telah menyebabkan krisis ekonomi yang menjelaskan perbelanjaan isi rumah dengan ketara, di bandar dan luar bandar. Menelusuri Pelan Pemulihan Negara (PPN) kerajaan telah mengambil inisiatif penting pada tahun 2021 dan 2022 untuk mengukuhkan semula sosioekonomi negara. Keluaran Dalam Negeri Kasar (KDNK), yang meliputi perbelanjaan dan pelaburan swasta, melonjak kepada 8.7 peratus pada tahun 2022 berbanding negatif 5.6 peratus pada 2020. Pengeluaran khas Kumpulan Wang Simpanan Pekerja (KWSP) telah meringankan beban perbelanjaan isi rumah. Dapatan Survei Perbelanjaan Isi Rumah (HES) pada tahun 2022 menerangkan secara komprehensif komposisi dan pola perbelanjaan yang dibuat oleh isi rumah.

B. LATAR BELAKANG SURVEI

HES 2022 merupakan survei kali ke-16 setelah kali pertama dilaksanakan pada 1957 dengan kekerapan sekali setiap lima tahun. Objektif utama pelaksanaan survei ini adalah untuk mendapatkan maklumat tentang paras dan corak perbelanjaan isi rumah ke atas pelbagai barang dan perkhidmatan. Sebelum tahun 2014, survei ini dijalankan setiap lima tahun dan kemudiannya disepadukan dengan Survei Pendapatan Isi Rumah (HIS) dengan kekerapan dua kali setiap lima tahun. Kedua-dua survei ini dilaksanakan menggunakan kaedah pensampelan rawak sistematik. Sampel yang dipilih pada survei kali ini berdasarkan senarai tempat kediaman yang diperoleh daripada Banci Penduduk dan Perumahan Malaysia 2020. Perkara ini membolehkan sampel yang dipilih dapat mewakili seluruh 8.4 juta populasi isi rumah sehingga ke peringkat daerah pentadbiran.

Pada awal pelaksanaannya, kegunaan data adalah terhad kepada penyediaan wajaran bagi pembentukan Indeks Harga Pengguna (IHP) dan kajian tentang pola perbelanjaan isi rumah. Namun begitu, seiring dengan perkembangan dan kemajuan negara, maklumat berkaitan perbelanjaan semakin penting sebagai indikator makro dan mikro ekonomi termasuklah pengukuran KDNK, pendapatan garis kemiskinan, kos sara hidup dan kuasa beli pengguna.

C. KONSEP DAN KLASIFIKASI PERBELANJAAN ISI RUMAH

Statistik perbelanjaan digunakan oleh kerajaan dalam membentuk, memantau dan menilai kesan polisi ekonomi dan sosial seperti perubahan dasar fiskal, permintaan produk dan perkhidmatan serta menjadi pelengkap kepada penyusunan akaun negara dalam konteks sektor isi rumah dalam negara. Oleh itu, adalah penting untuk menggunakan konsep dan definisi yang setara dengan saranan dan amalan antarabangsa. Rujukan yang digunakan pada masa ini adalah *System of National Account, 2018* oleh United Nations(UN); *Framework for Statistics on the Distribution of Household Income, Consumption and Wealth* (2013), *Organisation for Economic Co-operation and Development (OECD)*, dan *Classification of Individual Consumption According to Purpose (COICOP) 2018, United Nations*.

Klasifikasi COICOP telah disesuaikan dengan item perbelanjaan isi rumah di Malaysia dan digunakan dalam pengumpulan dan analisis data. Dalam penerbitan ini, penggunaan COICOP Malaysia (MCOICOP) 2021 telah dilaksanakan. MCOICOP 2021 adalah kesinambungan daripada COICOP sedia ada dan garis panduan COICOP terkini daripada UN, yang diterbitkan pada Mac 2018. Dalam laporan ini, data perbelanjaan isi rumah 2016 dan 2019 telah dipadankan semula dengan menggunakan pakai kod MCOICOP 2021 bagi membolehkan perbandingan yang setara dibuat [**Paparan 1**].

Antara perubahan utama dalam MCOICOP 2021 ialah pengenalan kod item 5 digit (sub kelas perbelanjaan) dan 8 digit (item perbelanjaan). Peluasan kod item ini adalah untuk memperincikan lagi kod item perbelanjaan sedia ada. Sebagai contoh kumpulan kod 12 COICOP 2019 dibahagikan kepada dua kod iaitu kod 12 dan 13 dalam MCOICOP 2021. Bagi kumpulan perbelanjaan bukan penggunaan pula, kod 13 di dalam COICOP 2019 telah ditukarkan kepada kod 90 (MCOICOP 2021). Selain itu, perbelanjaan bagi beberapa kumpulan telah disesuaikan semula [**Paparan 2**].

D. PENEMUAN SURVEI

Analisis yang terkandung di dalam laporan ini dipaparkan mengikut segmen iaitu statistik perbelanjaan penggunaan isi rumah, barang popular mengikut kumpulan utama terpilih dan perbelanjaan penggunaan isi rumah & IHP.

1. STATISTIK PERBELANJAAN PENGGUNAAN ISI RUMAH

Perbelanjaan penggunaan merujuk kepada bahagian pendapatan yang dibelanjakan untuk kegunaan persendirian ke atas barang dan perkhidmatan memainkan peranan yang penting dalam memacu ekonomi domestik.

Perbelanjaan penggunaan isi rumah bulanan purata tumbuh pada kadar yang lebih pantas iaitu 5.9 peratus, berbanding peningkatan pendapatan isi rumah purata (2.4%) bagi tempoh 2019 hingga 2022. Perbelanjaan penggunaan isi rumah bulanan purata meningkat daripada RM2,799 pada 2019 kepada RM3,342 pada tahun 2022. Sementara itu, perbelanjaan penggunaan isi rumah bulanan penengah meningkat daripada RM2,279 pada 2019 kepada RM2,770 pada 2022. Perbelanjaan penggunaan per kapita yang diperoleh dengan membahagikan nilai perbelanjaan isi rumah 2022 dengan bilangan penduduk Sabah, mencatatkan peningkatan sebanyak 7.6 peratus daripada RM803 pada 2019 kepada RM1,036 pada 2022.

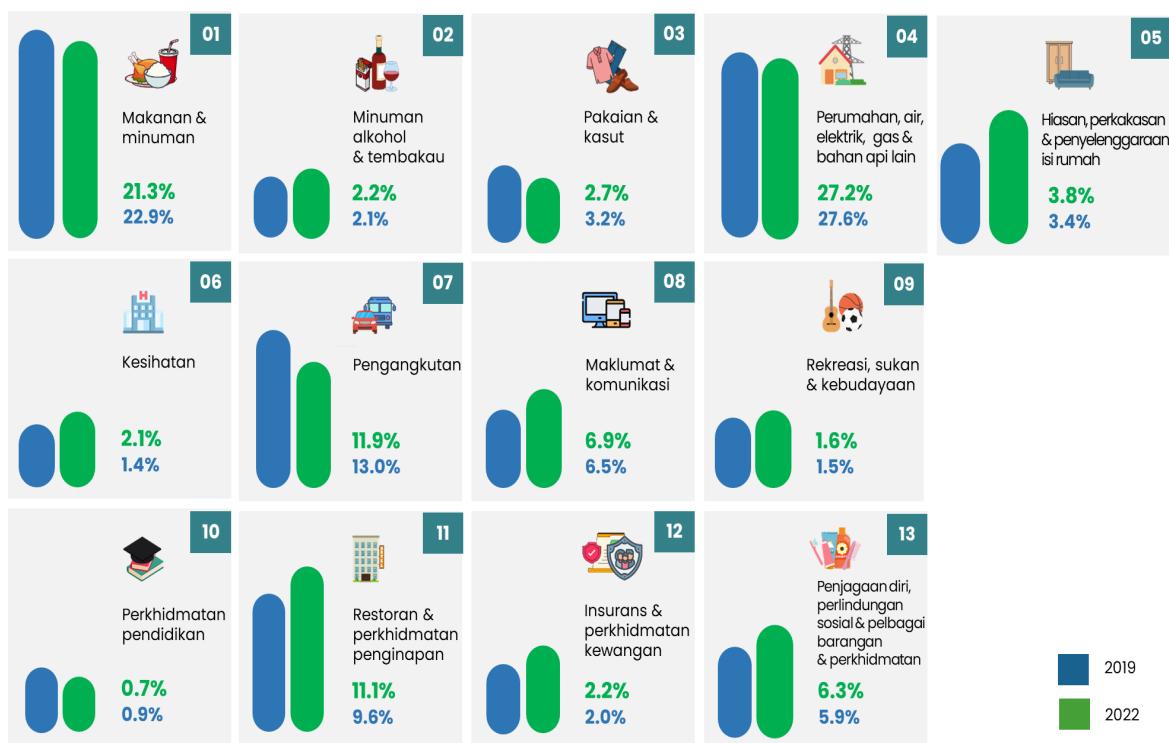

1.1 PERBELANJAAN PENGGUNAAN ISI RUMAH MENGIKUT KUMPULAN UTAMA

Pola perbelanjaan isi rumah boleh dipengaruhi oleh pelbagai faktor berdasarkan keutamaan keperluan dan saiz sesebuah isi rumah tersebut. Di kebanyakan negeri, kumpulan barang keperluan asas biasanya mendominasi perbelanjaan isi rumah. Situasi yang sama juga berlaku di Sabah, Perumahan, air, elektrik, gas & bahan api lain (27.2%); Makanan & minuman (21.3%); Pengangkutan (11.9%) dan Restoran & perkhidmatan penginapan (11.1%) merangkumi 71.5 peratus daripada keseluruhan komposisi perbelanjaan.

Terdapat lapan kumpulan yang menunjukkan peningkatan dalam komposisi perbelanjaan pada tahun 2022 berbanding 2019 iaitu Restoran & perkhidmatan penginapan (1.5 mata peratus); Kesihatan (0.7 mata peratus); Hiasan, perkakasan & penyelenggaraan isi rumah; Maklumat & komunikasi dan Penjagaan diri, perlindungan sosial & pelbagai barang & perkhidmatan dengan masing-masing pada 0.4 mata peratus, Insurans & perkhidmatan kewangan (0.2 mata peratus); Minuman alkohol & tembakau (0.1 mata peratus) dan Rekreasi, sukan & kebudayaan (0.1 mata peratus).

Di samping itu, lima kumpulan yang lain menunjukkan penurunan komposisi perbelanjaan pada tahun 2022 berbanding 2019 iaitu kumpulan Makanan & minuman (-1.6 mata peratus); Pengangkutan (-1.1 mata peratus); Pakaian & kasut (-0.5 mata peratus); Perumahan, air, elektrik, gas & bahan api lain (-0.4 mata peratus) dan Perkhidmatan pendidikan (-0.2 mata peratus) [Paparan 3].

Paparan 3 Komposisi perbelanjaan penggunaan isi rumah bulanan purata mengikut 13 kumpulan utama, Sabah, 2019 dan 2022

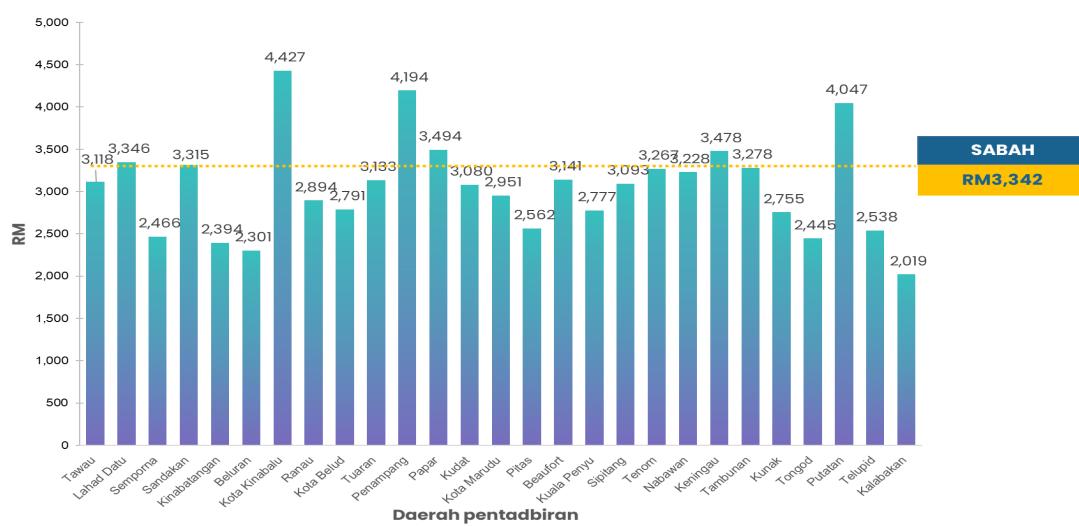

1.2 PERBELANJAAN PENGGUNAAN ISI RUMAH MENGIKUT DAERAH PENTADBIRAN

Kos sara hidup secara relatifnya berbeza antara negeri disebabkan perbezaan harga barang, tingkat pendapatan isi rumah dan kemampuan isi rumah untuk menampung kenaikan harga barang. Perbelanjaan isi rumah meningkat seiring dengan peningkatan pendapatan isi rumah. Di Sabah, perbelanjaan purata meningkat 5.9 peratus selari dengan peningkatan pendapatan purata sebanyak 2.4 peratus. Perbelanjaan penggunaan isi rumah mengikut daerah pentadbiran di Sabah merekodkan perbelanjaan tertinggi di daerah Kota Kinabalu dan terendah di daerah Kalabakan. Secara perbandingan, enam daerah pentadbiran mencatatkan perbelanjaan penggunaan isi rumah bulanan purata melebihi paras negeri (RM3,342) iaitu Kota Kinabalu (RM4,427), Penampang (RM4,194), Putatan (RM4,047), Papar (RM3,494), Keningau (RM3,478) dan Lahad Datu (RM3,346). Daerah pentadbiran lain merekodkan perbelanjaan penggunaan isi rumah bulanan purata di bawah paras negeri [Carta 1].

Kalabakan dan Pitas merekodkan komposisi perbelanjaan Makanan & minuman yang dominan iaitu masing-masing 34.3 peratus dan 31.2 peratus. Sementara itu, Tawau, Kinabatangan dan Kalabakan mencatatkan komposisi tertinggi bagi perbelanjaan Perumahan, air, elektrik, gas & bahan api lain (29.9%). Bagi kumpulan Restoran & perkhidmatan penginapan pula, komposisi perbelanjaan tertinggi dicatatkan oleh daerah Beluran (14.8%). Isi rumah di semua daerah membelanjakan sekurang-kurangnya satu peratus untuk kumpulan Insurans & perkhidmatan kewangan kecuali Kalabakan (0.7%).

Carta 1

Perbelanjaan penggunaan isi rumah bulanan purata mengikut daerah pentadbiran, Sabah, 2022

1.3 PERBELANJAAN PENGGUNAAN ISI RUMAH MENGIKUT SAIZ

Pola perbelanjaan isi rumah bergantung pada saiz isi rumah. Perbelanjaan penggunaan isi rumah meningkat selaras dengan pertambahan saiz isi rumah. Dapatan survei menunjukkan isi rumah perseorangan di Sabah membuat perbelanjaan bulanan purata sebanyak RM2,159 berbanding isi rumah yang menanggung empat orang ahli dan lebih (RM3,677).

Isi rumah perseorangan memperuntukkan 2.2 peratus manakala isi rumah dengan empat orang ahli dan lebih sebanyak 2.9 peratus untuk perbelanjaan Pakaian & kasut. Pola yang sama berlaku kepada perbelanjaan penggunaan bagi Perkhidmatan pendidikan, Maklumat & komunikasi dan Pengangkutan.

Isi rumah berkongsi perbelanjaan bagi kumpulan perbelanjaan Perumahan, air, elektrik, gas & bahan api lain. Dapatan menunjukkan isi rumah perseorangan berbelanja 35.4 peratus ke atas Perumahan, air, elektrik, gas & bahan api lain. Perbelanjaan tersebut semakin berkurang kepada 31.4 peratus bagi isi rumah dua orang, 28.7 peratus bagi isi rumah tiga orang dan 25.2 peratus bagi isi rumah empat orang dan lebih [Jadual 1].

Jadual 1

Peratusan perbelanjaan penggunaan isi rumah bulanan mengikut saiz, Sabah, 2022

Kumpulan perbelanjaan	Saiz isi rumah (orang)				Komposisi negeri
	Satu	Dua	Tiga	Empat dan lebih	
Makanan & minuman	17.2	18.8	21.7	22.1	21.3
Minuman alkohol & tembakau	2.6	2.2	2.6	2.1	2.2
Pakaian & kasut	2.2	2.4	2.5	2.9	2.7
Perumahan, air, elektrik, gas & bahan api lain	35.4	31.4	28.7	25.2	27.2
Hiasan, perkakasan & penyelenggaraan isi rumah	3.8	4.0	3.9	3.7	3.8
Kesihatan	2.8	2.7	2.3	1.9	2.1
Pengangkutan	9.4	11.0	11.1	12.6	11.9

Penjagaan diri, perlindungan sosial & pelbagai barang & perkhidmatan	5.4	6.0	5.9	6.5	6.3
JUMLAH	100.0	100.0	100.0	100.0	100.0

1.4 PERBELANJAAN PENGGUNAAN MENGIKUT KUMPULAN UMUR KETUA ISI RUMAH

Secara hipotesisnya, perbelanjaan penggunaan akan meningkat seiring dengan pertambahan sumber harta kekayaan. Antara faktor demografi yang boleh mempengaruhi pola perbelanjaan ialah perubahan umur. Isi rumah yang diketuai oleh golongan muda biasanya berbelanja kurang daripada purata perbelanjaan keseluruhan kerana mempunyai ahli yang kecil dan pendapatan yang lebih rendah. Perbelanjaan lebih besar biasa diperlukan selari dengan peningkatan umur, pendapatan dan saiz isi rumah. Seterusnya, perbelanjaan ini akan berkurang pada usia tua selari dengan pengurangan pendapatan dan saiz isi rumah.

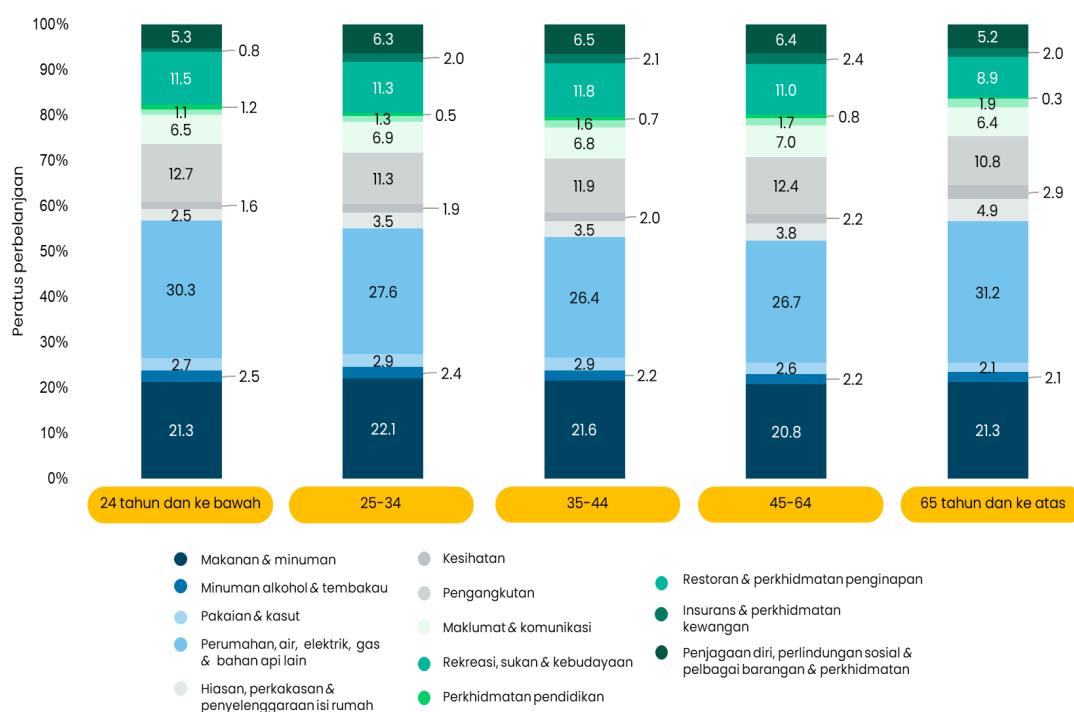

Di Sabah, isi rumah dengan ketua berumur 45 hingga 64 tahun merekodkan purata perbelanjaan penggunaan tertinggi iaitu RM3,547 pada tahun 2022, diikuti ketua isi rumah berumur antara 35 hingga 44 tahun dengan purata RM3,323. Sementara itu, isi rumah dengan ketua isi rumah berumur 24 tahun dan ke bawah merekodkan perbelanjaan penggunaan purata terendah dengan purata RM2,454 sebulan.

Dari segi komposisi perbelanjaan, ketua isi rumah berumur 65 tahun dan ke atas mencatatkan perbelanjaan yang tinggi ke atas kumpulan Perumahan, air, elektrik, gas & bahan api lain (31.2%) dan Makanan & minuman (21.3%). Corak yang sama dapat dilihat bagi kumpulan umur yang lain di mana perbelanjaan kumpulan Perumahan, air, elektrik, gas & bahan api lain mencatatkan peratusan perbelanjaan yang lebih tinggi berbanding Makanan & minuman. Sebagai contoh, kumpulan umur 24 tahun dan ke bawah mencatatkan perbelanjaan Perumahan, air, elektrik, gas & bahan api lain mewakili 30.3 peratus manakala Makanan & minuman ialah 21.3 peratus. Selain itu, perbelanjaan Restoran & perkhidmatan penginapan yang sering dikaitkan dengan makan di luar rumah, golongan isi rumah 35 hingga 44 tahun menunjukkan komposisi tertinggi (11.8%), diikuti isi rumah 24 tahun ke bawah (11.5%) dan isi rumah berumur 25 hingga 34 tahun (11.3%). Isi rumah berumur 45 hingga 64 tahun dan 65 tahun ke atas masing-masing hanya berbelanja 11.0 peratus dan 8.9 peratus ke atas perbelanjaan ini.

Dari segi perbelanjaan Pengangkutan pula, komposisi tertinggi dicatatkan oleh isi rumah berumur 24 tahun dan ke bawah (12.7%) diikuti oleh isi rumah berumur 45 hingga 64 tahun (12.4%) manakala isi rumah berumur 65 tahun dan ke atas pula membelanjakan hanya 10.8 peratus bagi perbelanjaan ini. Perbezaan agak ketara juga bagi perbelanjaan kesihatan di mana isi rumah berumur 65 tahun dan ke atas memperuntukkan 2.9 peratus ke atas perbelanjaan ini berbanding kumpulan umur yang lain. Semua golongan ketua isi rumah mencatatkan perbelanjaan kumpulan Insurans & perkhidmatan kewangan lebih dua peratus kecuali ketua isi rumah berumur 24 tahun dan ke bawah. Ini membuktikan keperluan isi rumah adalah berbeza mengikut kumpulan umur [Carta 2].

Carta 2

Peratusan perbelanjaan penggunaan bulanan mengikut kumpulan umur ketua isi rumah, Sabah, 2022

1.5 PERBELANJAAN PENGGUNAAN MENGIKUT KUMPULAN ISI RUMAH

Di Sabah, isi rumah² dibahagikan kepada tiga kumpulan utama iaitu Terendah 40% (B40), Pertengahan 40% (M40) dan Tertinggi 20% (T20). Kumpulan isi rumah B40 merujuk kepada isi rumah yang berpendapatan kurang daripada RM3,840 sebulan. Isi rumah yang berpendapatan di antara RM3,840 hingga RM8,529 diklasifikasikan sebagai kumpulan isi rumah M40 manakala T20 adalah kumpulan isi rumah yang berpendapatan RM8,530 dan lebih.

² Merujuk kepada isi rumah warganegara Malaysia

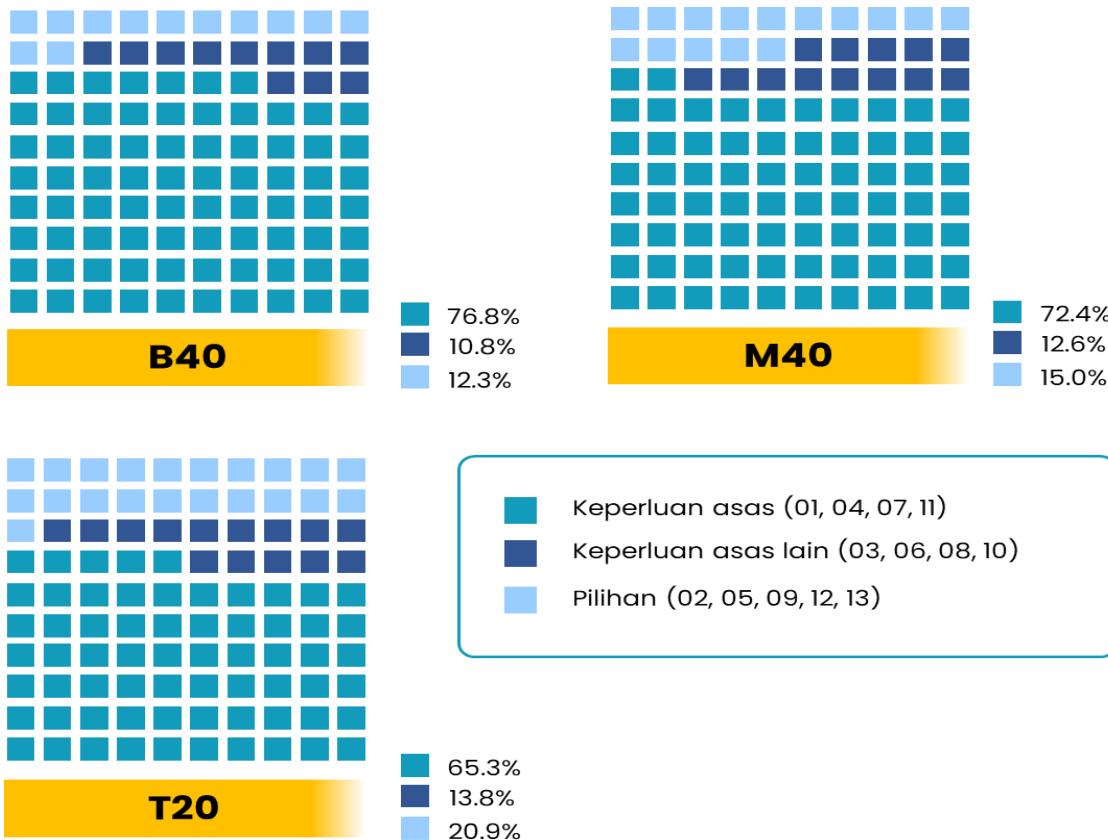

Perbelanjaan penggunaan dapat dibahagikan kepada tiga kategori barang iaitu keperluan asas, keperluan asas lain dan pilihan. Bagi barang keperluan asas, kumpulan B40 membuat perbelanjaan yang paling tinggi dengan 76.8 peratus berbanding kumpulan M40 (72.4%) dan kumpulan T20 (65.3%).

Berbeza pula dengan perbelanjaan ke atas kategori barang keperluan asas lain, kumpulan T20 merekodkan perbelanjaan tertinggi dengan 13.8 peratus berbanding kumpulan M40 (12.6%) dan B40 (10.8%). Bagi barang pilihan pula, kumpulan T20 mendominasi perbelanjaan sebanyak 20.9 peratus berbanding kumpulan M40 (15.0%) dan B40 (12.3%) [Paparan 4].

Kesimpulannya, kumpulan T20 dan M40 agak bebas menentukan corak perbelanjaan mengikut pilihan berbanding kumpulan B40 yang terpaksa memperuntukkan perbelanjaan ke atas keperluan asas kerana kekangan pendapatan.

Paparan 4

Peratusan perbelanjaan penggunaan bulanan mengikut kumpulan isi rumah, Sabah, 2022

Nota: Paparan adalah berdasarkan pembundaraan secara bebas

2. BARANGAN POPULAR MENGIKUT KUMPULAN UTAMA TERPILIH

Pola perbelanjaan dapat dilihat mengikut populariti sesuatu barang. Barang popular merujuk kepada barang dengan peratusan isi rumah yang berbelanja tertinggi dalam kumpulan utama terpilih. Populariti barang ini disebabkan antaranya oleh barang asas serta gaya hidup dan ketersediaan barang tersebut. Empat kumpulan perbelanjaan terpilih iaitu Makanan & minuman; Hiasan, perkakasan & penyelenggaraan isi rumah; Kesihatan dan Rekreasi, sukan & kebudayaan. Dari segi perincian, perbelanjaan kumpulan Makanan & minuman meliputi 1,340 item barang keperluan asas yang dikelaskan kepada 69 subkumpulan antaranya bijirin, buah-buahan, ikan, sayur, roti dan tepung. Dapatan survei menunjukkan 99.8 peratus isi rumah berbelanja beras pada tahun 2022. Ini diikuti oleh minyak masak (86.9%), ikan selayang/ basung (69.5%) dan kepak ayam (55.2%).

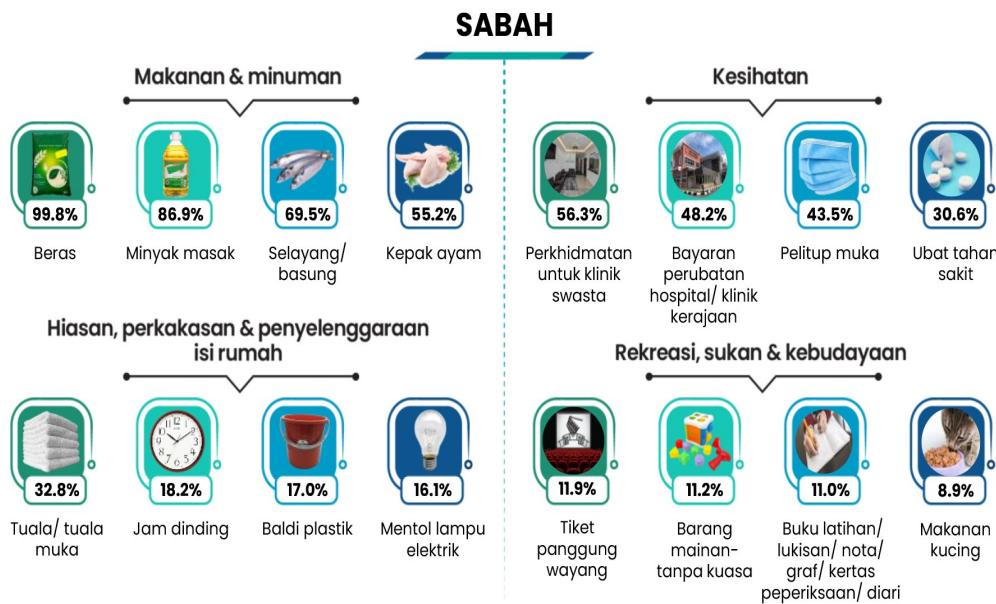

Semasa pandemik, isi rumah lebih berbelanja untuk item di dalam kumpulan Kesihatan. Perkhidmatan untuk klinik swasta merupakan item paling tinggi dibelanjakan sebanyak 56.3 peratus. Perbelanjaan kedua tertinggi adalah kepada bayaran perubatan hospital/ klinik kerajaan (48.2%), diikuti oleh pelitup muka (43.5%) manakala ubat tahan sakit adalah sebanyak 30.6 peratus. Kempat-empat item ini merupakan item popular yang dibelanjakan oleh isi rumah sepanjang tahun 2022.

Kumpulan Hiasan, perkakasan & penyelenggaraan isi rumah yang lebih bersifat pilihan kepada pengguna mencatatkan populariti yang lebih rendah berbanding barang keperluan asas. Tuala/ tuala muka mendominasi pembelian isi rumah dengan merekodkan 32.8 peratus diikuti oleh jam dinding (18.2%). Dua lagi barang popular adalah baldi plastik (17.0%) dan mentol lampu plastik (16.1%).

Seterusnya, bagi kumpulan perbelanjaan Rekreasi, sukan & kebudayaan sebanyak 11.9 peratus isi rumah membuat perbelanjaan tiket panggung wayang diikuti pembelian barang mainan tanpa kuasa dengan 11.2 peratus. Isi rumah juga berbelanja ke atas buku latihan/ lukisan/ nota/ graf, kertas peperiksaan dan diari di mana item berkenaan merekodkan peratusan perbelanjaan sebanyak 11.0 peratus. Selain itu, makanan kucing turut tersenarai sebagai item popular di Sabah dengan 8.9 peratus **[Paparan 5]**.

Paparan 5

Barangan popular bagi kumpulan utama terpilih Sabah, 2022

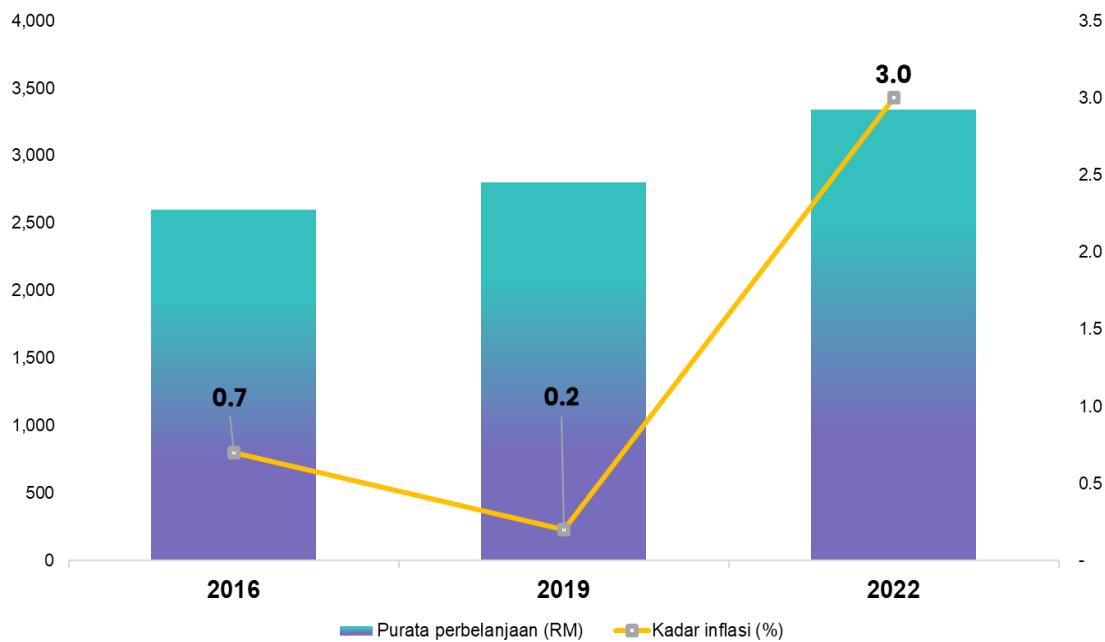

3. PERBELANJAAN PENGGUNAAN ISI RUMAH DAN INDEKS HARGA PENGGUNA

Perbelanjaan penggunaan isi rumah turut dipengaruhi oleh harga barang dan perkhidmatan. Secara umumnya, jika harga sesuatu barang meningkat, permintaan barang tersebut akan berkurang kerana pengguna cenderung membeli barang pengganti lain. Di Sabah, tingkat harga barang diukur menggunakan IHP. IHP mencerminkan kenaikan purata dalam harga dengan andaian bahawa wujudnya keseragaman dalam pola perbelanjaan seluruh isi rumah dengan mengandaikan kuantiti serta kualiti barang dan perkhidmatan dalam bakul penggunaan tidak berubah.

Kadar pertumbuhan tahunan dikompaun bagi perbelanjaan penggunaan isi rumah meningkat sebanyak 5.9 peratus setahun daripada RM2,799 (2019) kepada RM3,342 (2022). Aliran yang sama boleh dilihat daripada perubahan inflasi. Kadar inflasi pada tahun 2022 adalah pada 3.0 peratus yang mana lebih tinggi berbanding pada tahun 2019 (0.2%) dan pada tahun 2016 (0.7%) [Carta 3].

Carta 3

2016 – 2022**

A. INTRODUCTION

The economic crisis due to the COVID-19 pandemic has significantly affected household expenditure, both in urban and rural areas. Through the National Recovery Plan (NRP), the government has made crucial initiatives in 2021 and 2022 to strengthen the socioeconomic health of the nation. The Gross Domestic Product (GDP), which includes both private expenditure and investment, soared to 8.7 per cent in 2022 as compared to a negative 5.6 per cent in 2020. The withdrawals of Employees' Provident Fund (EPF) has eased the household's expenditure burden. The findings of Household Expenditure Survey (HES) in 2022 comprehensively explained the composition and patterns of household expenditures.

B. SURVEY BACKGROUND

HES 2022 is the 16th after the first survey was conducted in 1957 once in every five years. The main objective of this survey is to collect the information on the level and pattern of consumption expenditure by households on varieties of goods and services. Prior to 2014, the survey was conducted every five years and was then integrated with the Household Income Survey (HIS) which is conducted twice every five years. Both of these surveys were conducted scientifically by using the systematic random sampling method. The selected sample was based on the living quarters obtained from the 2020 Population and Housing Census of Malaysia. The selected sample is representative of all 8.4 million households as well as at the administrative district level.

The expenditure data is used to calculate weights for the formation of the Consumer Price Index (CPI) and the analysis of household spending trends. Nevertheless, as the nation develops and advances, data on expenditure becomes more crucial as a macro and micro economic indicators, including measurement of the GDP, poverty line income, cost of living and consumer purchasing power.

C. CONCEPTS AND CLASSIFICATIONS OF HOUSEHOLD EXPENDITURE

The government uses expenditure statistics to develop, track and assess the effects of economic and social policies, such as fiscal policy, consumer demand and the production of national accounts in the context of domestic household sector. Hence, it is important to use concepts and definitions that are comparable to international guidelines and best practices. The references currently in use are the System of National Accounts, 2008 by United Nations (UN); Framework for Statistics on the Distribution of Household Income, Consumption and Wealth (2013), Organisation for Economic Co-operation and Development (OECD) and Classification of Individual Consumption According to Purpose (COICOP) 2018, United Nations.

For the purpose of data collection and analysis, the COICOP classification has been adapted to household expenditure items in Malaysia. In this publication, the use of COICOP Malaysia (MCOICOP) 2021 has been implemented. MCOICOP 2021 is a continuation of the existing COICOP and the latest COICOP guidelines from the UN, published in March 2018. In this report, household expenditure data 2016 and 2019 had been mapped out with MCOICOP 2021 codes to ensure that an equivalent comparison can be made [Exhibit 1].

The introduction of 5 digit item codes (expenditure subclasses) and 8 digit item codes (expenditure items) were the major modifications in MCOICOP 2021. The purpose of the item code expansion is to provide more specifics for the current expenditure items code. For instance, code group 12 of COICOP 2019 is split into two codes in MCOICOP 2021, namely codes 12 and 13. Code 13 in COICOP 2019 has been replaced with code 90 (MCOICOP 2021) for the non-consumption expenditure category. In addition, expenditure for some groups have been revised [Exhibit 2].

D. SURVEY FINDINGS

The analysis included in this report is segmented by household consumption expenditure statistics, household consumption patterns, popular items by selected main group and household consumption expenditure & CPI.

1. HOUSEHOLD CONSUMPTION EXPENDITURE STATISTICS

Consumption expenditure refers to the portion of income spent on private consumption of goods and services plays an important role in accelerating the domestic economy.

The average monthly household consumption expenditure increased at a faster rate of 5.9 per cent, as compared to the average growth of household income (2.4%) for the period of 2019 to 2022. The average monthly household consumption expenditure rose from RM2,799 in 2019 to RM3,342 in 2022. Meanwhile, the median monthly household consumption expenditure increased from RM2,279 in 2019 to RM2,770 in 2022. Consumption expenditure per capita is obtained by dividing the value of household expenditure in 2022 by the number of population in Sabah, recorded an increased of 7.6 per cent from RM803 in 2019 to RM1,036 in 2022.

1.1 HOUSEHOLD CONSUMPTION EXPENDITURE BY MAIN GROUPS

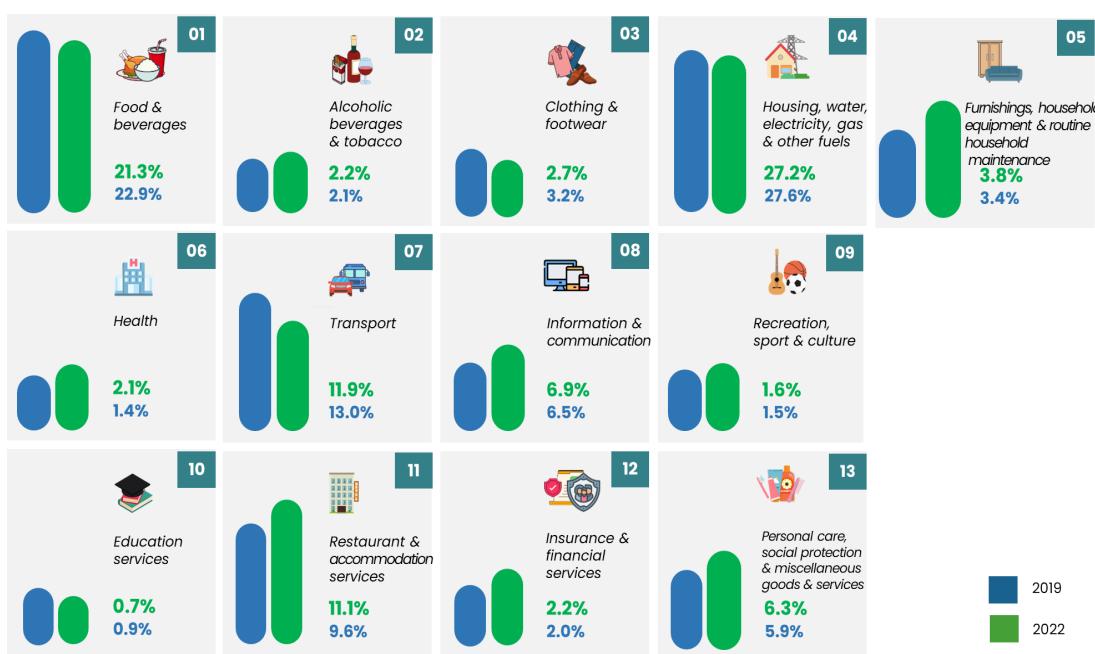

The expenditure patterns of households may be influenced by various factors depending on the prioritised demand and household size. In most states, the necessities group usually dominates household expenditure. Similar situation applied in Sabah, Housing, water, electricity, gas & other fuels (27.2%); Food & beverages (21.3%); Transport (11.9%) and Restaurant & accommodation services (11.1%) comprised 71.5 per cent of consumption expenditure.

There are eight groups that showed an increase in the composition of expenditure in 2022 as compared to 2019, namely Restaurant & accommodation services (1.5 percentage points); Health (0.7 percentage points); Furnishings, household equipment & routine household maintenance; Information & communication and Personal care, social protection & miscellaneous goods & services are 0.4 percentage points respectively, Insurance & financial services (0.2 percentage points); Alcoholic beverages & tobacco (0.1 percentage points) and Recreation, sports & culture (0.1 percentage points).

On the other hand, five groups showed a decrease in the composition of expenditure in 2022 as compared to 2019, namely the group Food & beverages (-1.6 percentage points); Transport (-1.1 percentage points); Clothing & footwear (-0.5 percentage points); Housing, water, electricity, gas & other fuels (-0.4 percentage points) and Education services (-0.2 percentage points) [Exhibit 3].

Exhibit 3

The composition of mean monthly household consumption expenditure by 13 main groups, Sabah, 2019 and 2022

1.2 HOUSEHOLD CONSUMPTION EXPENDITURE BY ADMINISTRATIVE DISTRICT

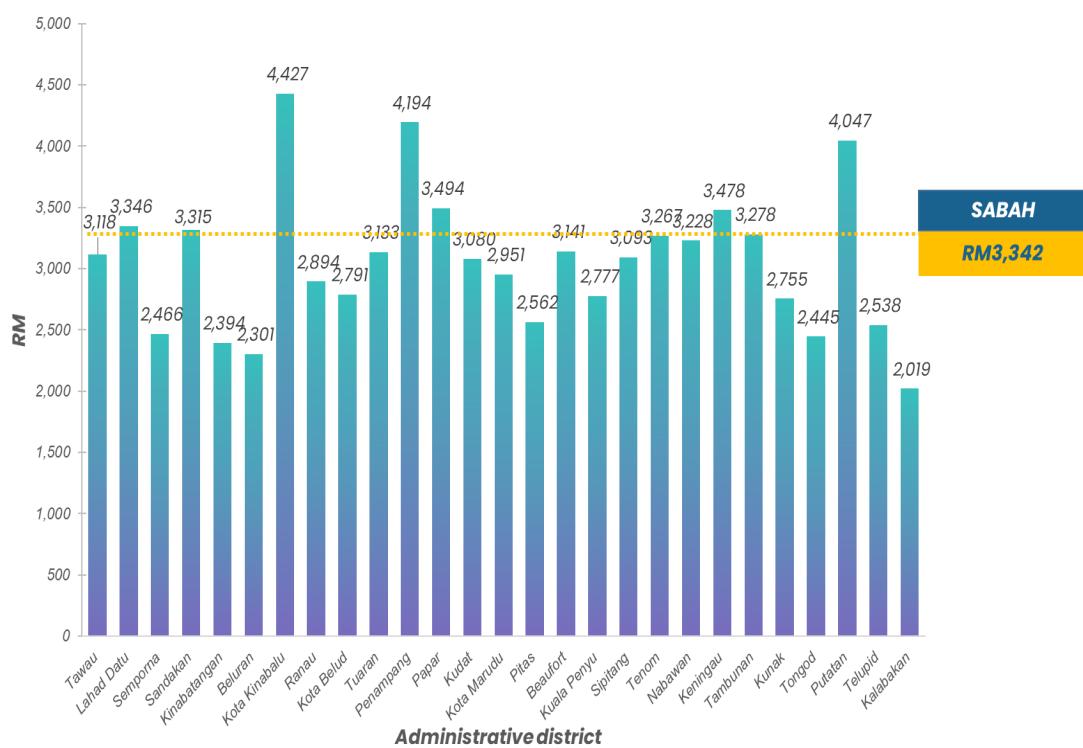

Cost of living relatively varies between states due to the difference in the prices of goods, household income levels and the ability of households to cope with rising prices. In Sabah, mean of expenditure increased 5.9 per cent in accordance with the increase of income at 2.4 per cent. The household consumption expenditure by administrative district in Sabah recorded the highest expenditure in Kota Kinabalu district and lowest in Kalabakan district.

By comparison, six administrative districts recorded mean monthly household consumption expenditure higher than state level (RM3,342) namely Kota Kinabalu (RM4,427), Penampang (RM4,194), Putatan (RM4,047), Papar (RM3,494), Keningau (RM3,478) and Lahad Datu (RM3,346). Meanwhile, other administrative districts recorded mean monthly household expenditure below than the state level [Chart 1].

Kalabakan and Pitas recorded the highest composition of Food & beverages which 34.3 per cent and 31.2 per cent respectively. Meanwhile, Tawau, Kinabatangan, and Kalabakan recorded the highest composition for expenditure on Housing, water, electricity, gas & other fuels (29.9%). For Restaurants & accommodation services, the highest expenditure composition was recorded by Beluran district (14.8%). Household in all administrative districts spent at least one per cent on Insurance & financial services except for Kalabakan with 0.7 per cent.

Chart 1

Mean monthly household consumption expenditure by administrative district, Sabah, 2022

1.3 HOUSEHOLD CONSUMPTION EXPENDITURE BY SIZE

Household spending pattern depends on household size. Household consumption expenditure increased as household size increased. In Sabah, a single household spent on average RM2,159 per month as compared to a household with four members and more (RM3,677).

Single households accounted for 2.2 per cent on Clothing & footwear while households with four members and more made up 2.9 per cent. The same pattern occurred for Education services, Information & communication and Transport.

Housing, water, electricity, gas & other fuels are items that are shared by a household. The findings depicted that a single household spent 35.4 per cent of its expenditure towards Housing, water, electricity, gas & other fuels. However, it has gradually decreased to 31.4 per cent for a two member households, 28.7 per cent for a three member households and 25.2 per cent for households with four members and more [Table 1].

Table 1 Percentage of monthly household consumption expenditure by size, Sabah, 2022

Expenditure group	Household size (person)				State composition
	One	Two	Three	Four and more	
Food & beverages	17.2	18.8	21.7	22.1	21.3
Alcoholic beverages & tobacco	2.6	2.2	2.6	2.1	2.2
Clothing & footwear	2.2	2.4	2.5	2.9	2.7
Housing, water, electricity, gas & other fuels	35.4	31.4	28.7	25.2	27.2
Furnishings, household equipment & routine household maintenance	3.8	4.0	3.9	3.7	3.8
Health	2.8	2.7	2.3	1.9	2.1
Transport	9.4	11.0	11.1	12.6	11.9

Insurance & financial services	2.6	2.5	2.1	2.1	2.2
Personal care, social protection & miscellaneous goods & services	5.4	6.0	5.9	6.5	6.3
TOTAL	100.0	100.0	100.0	100.0	100.0

1.4 CONSUMPTION EXPENDITURE LED BY HEAD OF HOUSEHOLD

Hypothetically, consumption expenditure will increase in tandem with the addition of property resources of wealth. Age change is another demographic aspect that have an impact on consumption trends. Because they have fewer members and lower earnings than overall households, households headed by young people typically spend less than the national average. As aged, income and household size rise, more money is typically needed. In keeping with the decline in income and household size, these costs will then start to decline as people aged.

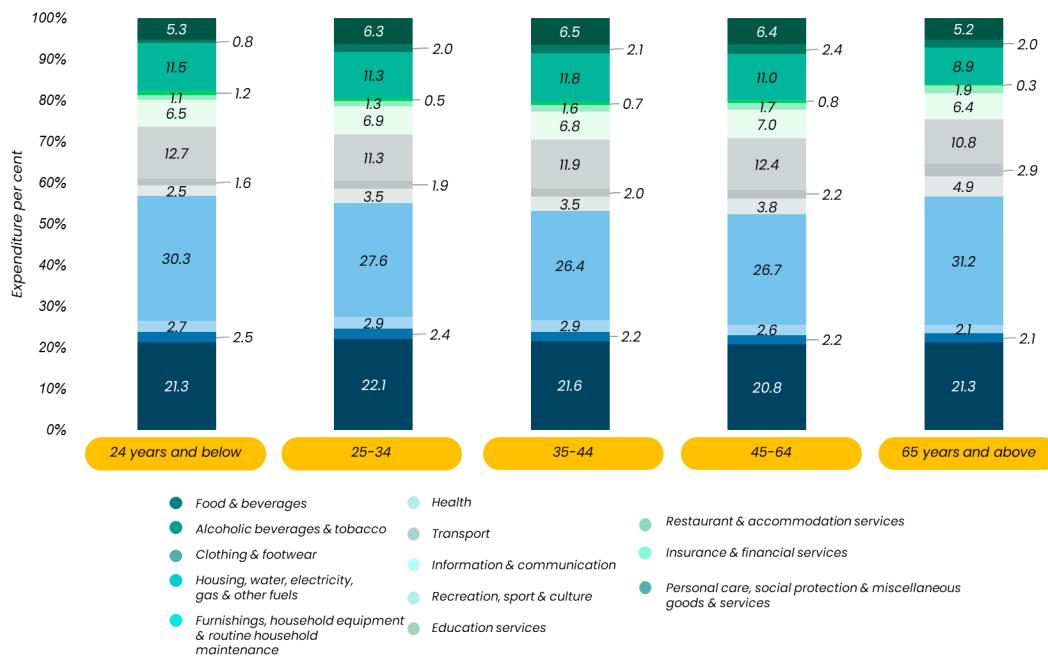

In Sabah, households with head of household aged between 45 to 64 years old recorded the highest mean of consumption expenditure with RM3,547 in 2022, followed by households with head of household aged between 35 to 44 years old with an average of RM3,323. Meanwhile, households with head of household aged 24 years and below recorded the lowest consumption expenditure with an average of RM2,454 per month.

In terms of expenditure composition, heads of households aged 65 years and above recorded high expenditure on Housing, water, electricity, gas & other fuel (31.2%) and Food & beverages (21.3%) groups. A similar pattern can be seen for others age groups where the expenditure of the Housing, water, electricity, gas & other fuels group recorded a higher percentage of expenditure as compared to Food & beverages. For example in the age group of 24 years and below Housing, water, electricity, gas & other fuels (30.3%) and Food & beverages (21.3%). On the other hand, for the expenditure on Restaurant & accommodation services which are often associated with eating out, the household group aged 35 to 44 years old showed the highest composition (11.8%), followed by households aged 24 years and below (11.5%) and household aged 25 to 34 years (11.3%). Households aged 45 to 64 years old and 65 years and above only spent 11.0 per cent and 8.9 per cent respectively.

Transport expenditure group recorded the highest composition for households aged 24 years and below (12.7%) followed by households aged 45 to 64 years (12.4%) while households aged 65 years and above spent only 10.8 per cent on these expenses. The difference is also quite significant for health expenditure where households aged 65 and above allocate 2.9 per cent on this expenditure as compared to other age groups. All heads of households recorded expenditure of Insurance & financial services group more than two per cent except the household aged 24 years and below. This indicates that household needs vary among age groups [Chart 2].

Chart 2

Percentage of monthly consumption expenditure led by head of household, Sabah, 2022

1.5 CONSUMPTION EXPENDITURE BY HOUSEHOLD GROUP

In Sabah, households² are divided into three main groups which are the Bottom 40% (B40), Middle 40% (M40) and Top 20% (T20). The B40 household group refers to households earning less than RM3,840 per month. Households earning between RM3,840 to RM8,529 are classified as M40 households while T20 households are earning RM8,530 and above.

Consumption expenditure can be divided into three categories of goods which are basic needs, other basic needs and choices. For basic necessities, the B40 group spend the most with 76.8 per cent as compared to the M40 group (72.4%) and the T20 group (65.3%).

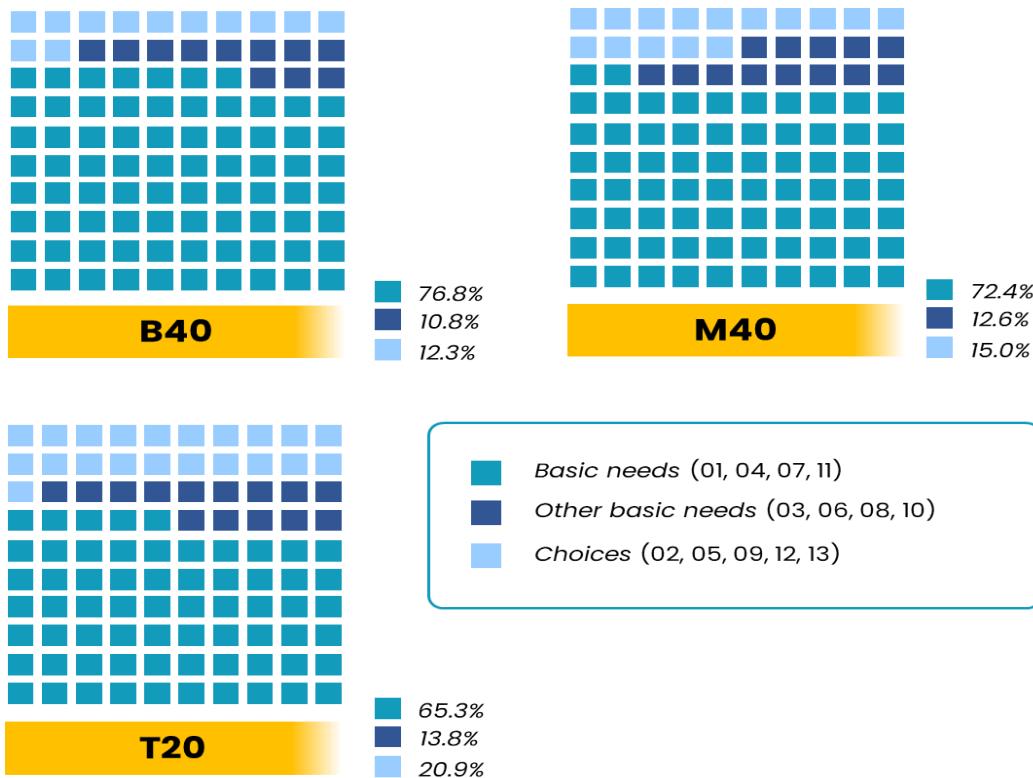

In contrast to spending on other basic necessities, T20 group recorded the highest expenditure with 13.8 per cent as compared to the M40 (12.6%) and B40 (10.8%). For preferred goods, the T20 group dominates spending by 20.9 per cent as compared to the M40 (15.0%) and B40 (12.3%) [Exhibit 4].

In conclusion, the T20 and M40 groups are relatively free to determine their spending patterns according to their choices as compared to the B40 group who have to spend on basic needs due to income constraints.

Exhibit 4

Percentage of monthly household consumption expenditure by household group, Sabah, 2022

Note: The exhibit displayed based on independent rounding

2. POPULAR ITEMS BY SELECTED MAIN GROUPS

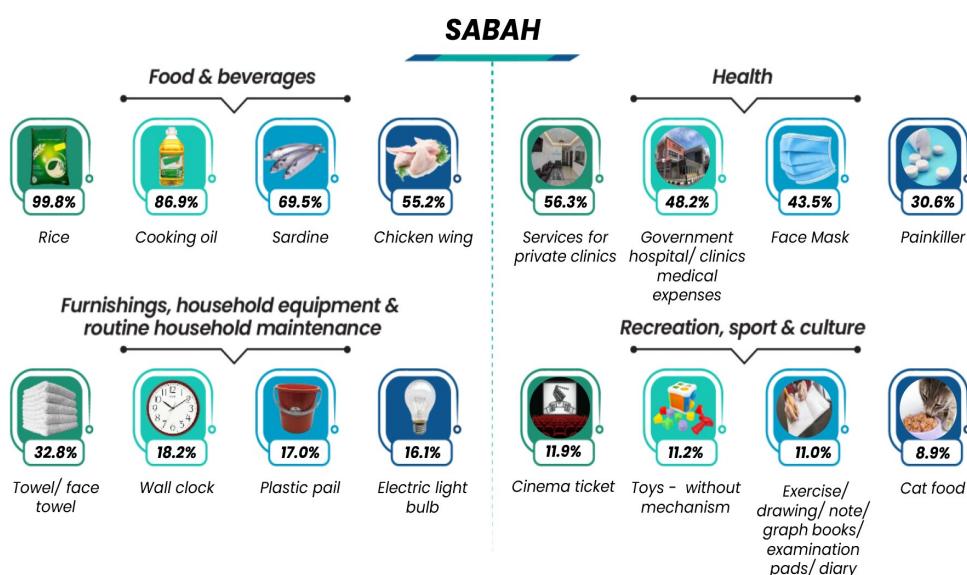

Expenditure patterns to a certain extend reflect the popularity of an item. Popular items refer to goods with the highest percentage of household spending in the selected main group. The popularity of these items is due among other things to the basic items as well as the lifestyle and availability of the items. Four selected groups namely Food & beverages; Furnishings, household equipment & routine household maintenance; Health and Recreation, sport & culture. In terms of specifics, the expenditure of the Food & beverages group covers 1,340 items of necessities which are classified into 69 subgroups including grains, fruits, fish, vegetables, bread and flour. The survey results showed that 99.8 per cent of households will spend on rice in 2022. This is followed by cooking oil (86.9%), sardine fish (69.5%) and chicken wing (55.2%).

During the pandemic, more are spent on items from the Health group. Services on private clinics are the highest item spent by 56.3 per cent. The second highest expenditure was on services for medical fees for government hospitals/ clinics (48.2%), followed by face mask (43.5%) while painkiller accounted for 30.6 per cent. These four items were popular items spent by households throughout 2022.

Furnishings, household equipment & routine household maintenance group was the most optional for consumers household that recorded the lower popularity as compared to the basic necessities. Towel/ face towel dominates household purchases which recorded 32.8 per cent, followed by wall clock (18.2%). Two others popular items are plastic pail (17.0%) and electric light bulb (16.1%).

The next highest proportion of household spending was for Recreation, sport & culture group, with 11.9 per cent household spent on cinema tickets, followed by toys without mechanism purchases at 11.2 per cent. Besides that, exercise/ drawing/ note/ graph books, examination pads & diary and cat food are also listed in the list of popular items with recorded percentage of expenditure 11.0 per cent and 8.9 per cent respectively [Exhibit 5].

Exhibit 5 Popular items for selected main groups, Sabah, 2022

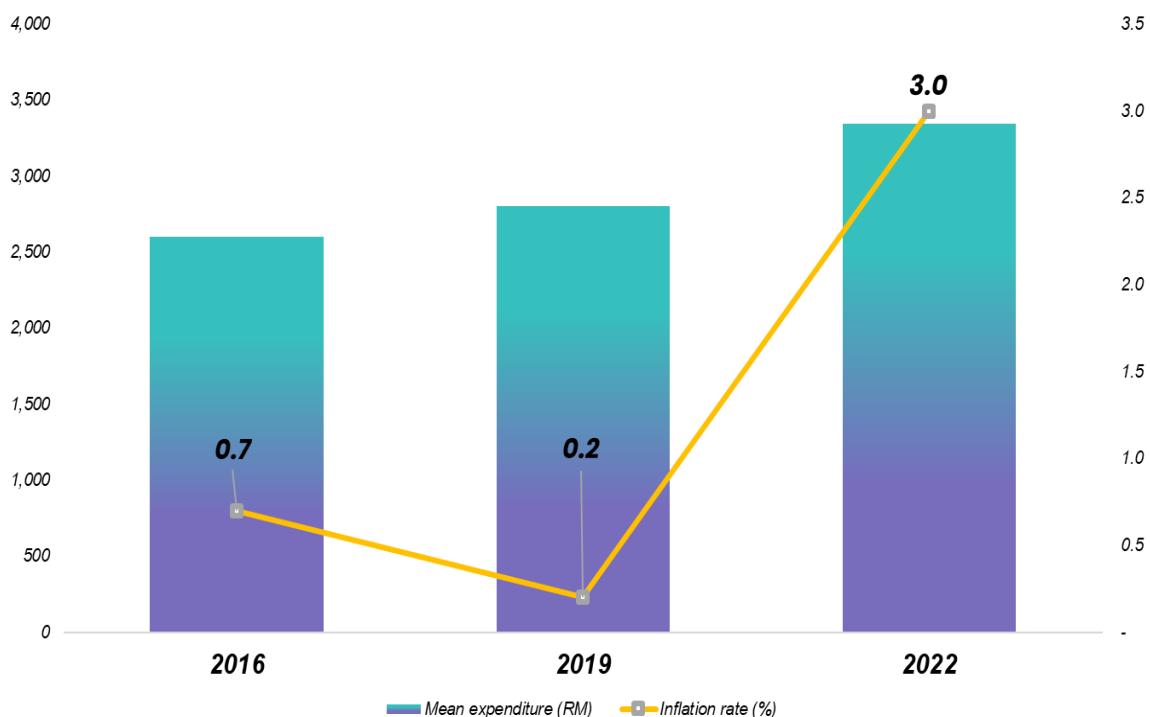

3. HOUSEHOLD CONSUMPTION EXPENDITURE AND CONSUMER PRICE INDEX

Household consumption expenditure is also influenced by the price of goods and services. Generally, if the price of an item increases, demand for the items will be reduced because consumers tend to buy substitute items. In Malaysia, the price level of goods is measured using the CPI. The CPI reflects the average increase in prices on the assumption that there is a uniformity in the overall household spending pattern and assumes that the quantity and quality of goods and services in the consumption basket remained unchanged.

The Compounded Annual Growth Rate (CAGR) for household consumption expenditure increased by 5.9 per cent per annum from RM2,799 (2019) to RM3,342 (2022). The same trend can be seen from changes of inflation. Inflation rate in 2022 was at 3.0 per cent which is higher than 2019 (0.2%) and 2016 (0.7%) [Chart 3].

NOTA TEKNIKAL

TECHNICAL NOTES

LAPORAN SURVEI

PERBELANJAAN ISI RUMAH

HOUSEHOLD EXPENDITURE SURVEY REPORT

2022

Muka surat ini sengaja dibiarkan kosong
This page is deliberately left blank

1. PENGENALAN

Statistik yang diterbitkan dalam laporan ini adalah hasil dapatan Survei Perbelanjaan Isi Rumah (HES) 2022 yang dijalankan oleh Jabatan Perangkaan Malaysia (DOSM). Bermula tahun 2016, survei ini dijalankan dua kali dalam tempoh lima tahun. Laporan ini menyediakan statistik perbelanjaan bagi keseluruhan isi rumah di Malaysia. Nota teknikal ini merangkumi penerangan terperinci bagi membantu pengguna untuk memahami dengan lebih jelas berkaitan HES 2022.

2. OBJEKTIF SURVEI

Objektif utama survei adalah seperti berikut:

- i. Mengumpul maklumat tentang paras dan corak perbelanjaan penggunaan oleh Isi Rumah (IR) ke atas pelbagai jenis barang dan perkhidmatan;
- ii. Merupakan asas bagi menentukan jenis barang dan perkhidmatan yang akan dimasukkan ke dalam bakul Indeks Harga Pengguna (IHP); dan
- iii. Digunakan untuk mengemaskini wajaran IHP di mana IHP merupakan pengukur kepada kadar perubahan purata harga bagi sekumpulan barang dan perkhidmatan yang mewakili corak perbelanjaan IR di Malaysia.

3. KAEADAH PENGUMPULAN DATA

- 3.1 Survei ini menggunakan kaedah temu ramah bersemuka dengan menggunakan borang soal selidik bagi mendapatkan maklumat daripada responden. Dalam tempoh survei, penemuramah yang dilatih akan melawat IR di Tempat Kediaman (TK) terpilih bagi mengumpul maklumat berkaitan demografi ahli isi rumah dan maklumat terperinci berkaitan pendapatan dan perbelanjaan mengikut klasifikasi barang dan perkhidmatan.
- 3.2 Semakan kualiti data akan dibuat oleh pegawai berpengalaman dari DOSM Negeri bagi mengesan dan membetulkan sebarang kesilapan atau maklumat yang tertinggal ketika survei dilaksanakan. Proses semakan semula di lapangan juga dilaksanakan bagi IR terpilih untuk memastikan kualiti pungutan data.

4. TEMPOH RUJUKAN

Data perbelanjaan IR dipungut bagi dua tempoh rujukan. Tempoh rujukan pertama ialah selama sebulan merujuk kepada perbelanjaan harian yang dilakukan oleh IR bermula hari pertama hingga hari terakhir bulan berkenaan. Tempoh rujukan kedua ialah bagi barang yang tidak kerap dibeli seperti barang tahan lama dan item terpilih yang mana tempoh rujukan dikira bagi 11 bulan yang lalu.

Sebagai contoh, sekiranya bulan survei adalah Disember 2022, maka tempoh rujukan sebulan IR yang dikira adalah dari 1 Disember 2022 sehingga 31 Disember 2022 manakala bagi tempoh rujukan kedua ialah dari 1 Januari 2022 sehingga 30 November 2022.

5. SKOP DAN LIPUTAN

- 5.1 Pemilihan sampel bagi survei ini telah mengambil kira kedua-dua kawasan bandar dan luar bandar dalam daerah pentadbiran bagi semua negeri di Malaysia.
- 5.2 Survei ini meliputi IR yang tinggal di TK persendirian dan **tidak termasuk** mereka yang tinggal di TK institusi seperti asrama, hotel, hospital, rumah orang tua, penjara, rumah kebajikan, rumah tumpangan dan pekerja yang tinggal di rumah kongsi.

6. KONSEP DAN DEFINISI

6.1 Perbelanjaan Isi Rumah

Definisi perbelanjaan isi rumah yang diguna pakai adalah mengikut konsep dan garis panduan *System of National Accounts, 2008* oleh *United Nations* dan *Framework for Statistics on the Distribution of Household Income, Consumption and Wealth, 2013* oleh *Organisation for Economic Co-operation and Development (OECD)*. Perbelanjaan IR ini boleh dibahagikan kepada dua jenis iaitu **perbelanjaan penggunaan** dan **perbelanjaan bukan penggunaan**.

i. Perbelanjaan penggunaan isi rumah

Perbelanjaan penggunaan IR adalah segala perbelanjaan untuk kegunaan persendirian ke atas barang dan perkhidmatan sepanjang tempoh rujukan. Perbelanjaan ini termasuk:

- Semua perbelanjaan sama ada tunai atau kredit oleh ahli-ahli IR ke atas barang dan perkhidmatan untuk kegunaan persendirian. Jenis perbelanjaan ini termasuk juga cukai-cukai yang dibayar untuk mendapatkan barang dan perkhidmatan tersebut;

- Semua barang, perkhidmatan dan kemudahan yang diterima dalam bentuk mata benda sama ada secara percuma atau konsesi, diambil kira sebagai perbelanjaan. Contohnya, makanan dan tempat penginapan percuma atau dengan bayaran konsesi. Nilai daripada makanan dan tempat penginapan tersebut dikira sebagai perbelanjaan kepada IR berkenaan;
- Barang penggunaan sendiri. Contohnya sayur-sayuran hasil tanaman sendiri atau barang yang diambil dari kedai runcit sendiri untuk kegunaan persendirian perlu dibuat imputasi mengikut harga runcit. Nilai harga tersebut dikira sebagai perbelanjaan IR berkenaan; dan
- Nilai sewa bersih rumah yang diduduki oleh pemiliknya juga diambil kira sebagai perbelanjaan. Nilai sewa tersebut perlu dibuat imputasi mengikut nilai sewa pasaran semasa untuk jenis rumah yang sama di kawasan yang sama.

ii) **Perbelanjaan bukan penggunaan isi rumah**

Perbelanjaan bukan penggunaan isi rumah adalah merujuk kepada perbelanjaan berikut:

- Pembayaran yang dikenakan kepada pembayar ke atas perkhidmatan yang tidak dapat dikenalpasti dan bertujuan untuk menambah hasil kerajaan;
- Pembayaran yang tidak mempunyai hubungan secara langsung dengan perolehan perkhidmatan yang diterima (misalnya yuran keahlian, hadiah, pemberian kepada derma amal/badan agama).

Contoh perbelanjaan bukan penggunaan isi rumah ialah:

- i. Cukai pendapatan dan cukai langsung lain seperti zakat, fitrah dan cukai jalan;
- ii. Pencaruman keselamatan sosial dari majikan dan pekerja iaitu KWSP dan PERKESO;
- iii. Bayaran ganti rugi;
- iv. Bayaran wajib dan denda seperti bayaran membuat pasport, bayaran ujian memandu dan denda untuk kesalahan trafik;
- v. Pemberian kepada badan amal/badan agama;
- vi. Yuran keahlian kelab;

- vii. Pemberian kepada IR lain;
- viii. Bayaran nafkah; dan
- ix. Hadiah berupa wang tunai dan mata benda.

Selain itu, survei ini juga meliputi simpanan wang, amaun yang dilabur atau dipinjam dan pembayaran balik pinjaman termasuk pinjaman perumahan, kerugian perjudian, pemberian tunai dan derma. Walaupun ini adalah di luar daripada konsep perbelanjaan, maklumat ini adalah sebahagian daripada survei perbelanjaan dan perlu diliputi. Tujuannya ialah untuk mendapatkan rekod akaun IR yang lengkap dan juga membantu dalam keseimbangan secara kasar antara pendapatan dan penerimaan lain dengan perbelanjaan dan pembayaran lain dalam tempoh rujukan bagi setiap IR. Maklumat ini juga secara langsung memberi gambaran dan jaminan kualiti data yang tinggi.

Perkara-perkara yang **TIDAK TERMASUK** dalam perbelanjaan IR adalah seperti berikut:

- i. Perbelanjaan untuk makanan, penginapan, perjalanan dan hiburan semasa bertugas sama ada untuk perniagaan atau urusan kerajaan, perbelanjaan pakaian seragam, peralatan & kelengkapan kerja dan lain-lain untuk kegunaan pekerjaan yang dibayar oleh seorang kakitangan berkaitan dengan perniagaan majikannya dan dibayar balik oleh majikan; dan
- ii. Perkhidmatan yang diberi percuma kepada orang awam contohnya perkhidmatan rekreasi dan kebudayaan di taman permainan kanak-kanak dan tempat letak kereta awam.

6.2 Ukuran Perbelanjaan Penggunaan

Dalam menentukan nilai perbelanjaan penggunaan, tiga pendekatan biasa digunakan iaitu:

i. Pendekatan Perolehan

Nilai pembelian yang direkodkan pada masa barang dan perkhidmatan diperoleh tanpa mengira sama ada digunakan kesemuanya atau tidak; atau dibayar sepenuhnya atau tidak dalam tempoh rujukan. Pendekatan perolehan ini juga telah dikembangkan untuk mengambil kira anggaran nilai bagi barang tidak tahan lama daripada hasil keluaran sendiri dan barang serta perkhidmatan yang diberi atau diterima dalam bentuk mata benda.

ii. **Pendekatan Penggunaan**

Pendekatan ini digunakan pada keadaan tertentu bagi barang tahan lama yang mempunyai jangka hayat yang panjang (contoh: kereta, kenderaan pengguna lain atau alat pertukangan) dan penggunaan utiliti seperti air dan elektrik.

iii. **Pendekatan Pembayaran**

Pembayaran yang melibatkan bayaran pendahuluan bagi mendapatkan sesuatu barang dan perkhidmatan yang mana barang dan perkhidmatan tersebut belum diterima dalam bulan rujukan (contoh: bayaran pendahuluan pembelian kereta).

6.3 Pengelasan Item Perbelanjaan

Perbelanjaan diklasifikasikan kepada 14 kumpulan utama mengikut ***Classification of Individual Consumption According to Purpose 2018 (COICOP 2018), United Nations:***

- 01 Makanan dan Minuman;
- 02 Minuman Alkohol dan Tembakau;
- 03 Pakaian dan Kasut;
- 04 Perumahan, Air, Elektrik, Gas dan Bahan Api Lain;
- 05 Hiasan, Perkakasan dan Penyelenggaraan Isi Rumah;
- 06 Kesihatan;
- 07 Pengangkutan;
- 08 Maklumat dan Komunikasi;
- 09 Rekreasi, Sukan dan Kebudayaan;
- 10 Perkhidmatan Pendidikan;
- 11 Restoran dan Perkhidmatan Penginapan;
- 12 Insurans dan Perkhidmatan Kewangan;
- 13 Penjagaan Diri, Perlindungan Sosial dan Pelbagai Barang dan Perkhidmatan; dan
- 90 Perbelanjaan Bukan Penggunaan Isi Rumah.

Walau bagaimanapun, dalam penerbitan ini, item-item perbelanjaan penggunaan merangkumi 13 kumpulan utama (01 - 13) sahaja.

6.4 Jenis Barang

Pengelasan perbelanjaan isi rumah kepada **5 kategori** jenis barang seperti berikut:-

1 Barang Tahan Lama

Barang-barang yang mempunyai **jangka hayat** penggunaan yang **melebihi satu tahun** dan secara relatifnya **mempunyai nilai yang tinggi**, seperti motokar, peti sejuk dan televisyen.

2 Barang Semi Tahan Lama

Barang-barang yang mempunyai **jangka hayat** penggunaan selama **lebih kurang setahun** atau secara relatifnya **tidak mempunyai harga yang tinggi**, seperti pakaian, tekstil dan alat berkebun.

3 Barang Tidak Tahan Lama

Barang-barang yang mempunyai **jangka hayat** penggunaan **yang pendek** dan mempunyai harga secara relatifnya **tidak tinggi**. Contohnya ialah beras, daging, ikan, susu, buah-buahan, sayur, air minuman, petrol dan lain-lain.

4 Perkhidmatan

Perbelanjaan yang dibayar oleh IR ke atas segala perkhidmatan seperti rawatan perubatan, hiburan, rekreasi, kebudayaan, pendidikan dan lain-lain yang dibekalkan sama ada oleh kerajaan atau pun swasta; termasuk juga perbelanjaan makanan atau minuman di restoran, kafe atau hotel.

5 Lain-lain

Pembayaran dalam bentuk pindahan seperti cukai pendapatan, pencaruman keselamatan pampasan, bayaran pampasan, denda, bayaran wajib serta pemberian kepada IR lain. Pembayaran lain seperti amaun yang dilabur atau dipinjam, bayaran balik pinjaman dan tambahan kepada simpanan.

6.5 Tempat Kediaman

Tempat kediaman adalah suatu struktur yang dibina **berasingan** dan **bebas** yang lazimnya digunakan untuk tempat tinggal.

- i. **Berasingan:** Struktur dianggap sebagai berasingan jika ia dikelilingi oleh dinding, pagar atau lain-lain serta ditutupi oleh bumbung.
- ii. **Bebas:** Struktur dikatakan bebas apabila ia mempunyai jalan masuk terus dari laluan umum, tempat lalu lintas atau ruang lapang (iaitu penghuni boleh masuk atau keluar dari TK mereka tanpa melalui perkarangan orang lain).

6.6 Isi Rumah

Seorang atau sekumpulan orang yang bersaudara atau tidak bersaudara yang biasanya tinggal bersama dalam satu **tempat kediaman** serta membuat peruntukan (perbelanjaan) secara bersama untuk makanan dan keperluan hidup yang lain.

6.7 Ketua Isi Rumah

Ketua IR ditakrifkan sebagai seorang ahli biasa sama ada lelaki atau perempuan yang dianggap sebagai ketua oleh ahli IR yang lain. Ketua IR mesti seorang penerima pendapatan dan berumur 15 tahun dan ke atas.

6.8 Kumpulan Etnik

Kumpulan etnik dikategorikan di kalangan warganegara Malaysia setelah mengasingkan bukan warganegara. Pengelasan tersebut adalah seperti berikut:

- i. Warganegara Malaysia
 - a. Bumiputera
 - b. Cina
 - c. India
 - d. Lain-lain
- ii. Bukan warganegara Malaysia

7. RANGKA PENSAMPELAN

- 7.1 Rangka yang digunakan bagi pemilihan sampel HES 2022 adalah berdasarkan Rangka Pensampelan Isi Rumah yang terdiri daripada Blok Penghitungan (BP) yang diwujudkan untuk Banci Penduduk dan Perumahan 2020 yang dikemas kini dari semasa ke semasa. BP merupakan suatu kawasan muka bumi yang diwujudkan untuk tujuan pelaksanaan operasi survei. Secara purata, setiap BP mengandungi antara 80 hingga 120 TK. Semua BP dibentuk dalam lingkungan sempadan yang diwartakan iaitu daerah pentadbiran, mukim atau kawasan pihak berkuasa tempatan.
- 7.2 BP dalam rangka pensampelan dikelaskan mengikut kawasan bandar dan luar bandar. Kawasan bandar ditakrif sebagaimana yang telah digunakan dalam Banci Penduduk dan Perumahan Malaysia 2020. Kawasan **bandar** ialah kawasan yang diwartakan serta kawasan tepu bina yang bersempadan dengannya dan gabungan kedua-dua kawasan ini mempunyai penduduk seramai 10,000 orang atau lebih semasa Banci Penduduk dan Perumahan Malaysia 2020. Sebaliknya, kawasan yang diwartakan yang mempunyai jumlah penduduk kurang daripada 10,000 orang dan kawasan yang tidak diwartakan dikelaskan sebagai kawasan **luar bandar**.
- 7.3 Kawasan tepu bina adalah kawasan yang terletak bersebelahan kawasan yang diwartakan dan mempunyai sekurang-kurangnya 60 peratus penduduk (berumur 15 tahun dan ke atas) yang terlibat dalam aktiviti bukan pertanian.
- 7.4 Definisi kawasan bandar juga mengambil kira kawasan pembangunan khusus iaitu kawasan pembangunan yang tidak diwartakan dan boleh dikenalpasti serta terpisah dari kawasan yang diwartakan atau kawasan tepu bina melebihi 5 kilometer dan mempunyai penduduk sekurang-kurangnya 10,000 orang dengan 60 peratus penduduk (berumur 15 tahun dan ke atas) yang terlibat dalam aktiviti bukan pertanian.

- 7.5 Pembandaran merupakan proses yang dinamik dan sentiasa berubah mengikut kemajuan dan pembangunan. Oleh itu, kawasan bandar bagi Banci Penduduk dan Perumahan Malaysia 2010 dan 2020 tidak semestinya merujuk kepada kawasan yang sama kerana kawasan yang memenuhi kriteria bandar akan terus bertambah dan berkembang mengikut masa.
- 7.6 Klasifikasi kawasan mengikut strata yang digunakan adalah seperti berikut:

Strata	Jumlah penduduk dalam kawasan yang diwartakan, tpu bina dan kawasan pembangunan khusus
Metropolitan	75,000 dan lebih
Bandar besar	10,000 hingga 74,999
Bandar kecil	1,000 hingga 9,999
Luar bandar	Kawasan selebihnya

- 7.7 Bagi tujuan pensampelan, klasifikasi kawasan seperti di perkara 7.6 adalah digunakan untuk semua negeri serta Wilayah Persekutuan. Bagi Sabah dan Sarawak, memandangkan masalah kesukaran untuk akses ke kawasan pedalaman, strata luar bandar disesuaikan dengan *inaccessibility* dari pusat bandar terdekat.
- 7.8 Bagi tujuan penjadualan laporan, strata-strata dicantumkan seperti berikut:

$$\begin{array}{ll} \text{Bandar} & = \text{Metropolitan} + \text{Bandar besar} \\ \text{Luar bandar} & = \text{Bandar kecil} + \text{Keseluruhan luar bandar} \end{array}$$

8. REKA BENTUK PENSAMPELAN

- 8.1 Reka bentuk pensampelan berstrata dua peringkat telah digunakan dalam HES 2022. Pembentukan strata adalah seperti berikut:

Strata utama	Meliputi semua negeri di Malaysia
Strata kedua	Meliputi semua daerah pentadbiran mengikut negeri di Malaysia
Strata ketiga	Meliputi bandar dan luar bandar seperti yang dinyatakan di perkara 7.8

- 8.2 Pemilihan sampel dilakukan pada peringkat BP dengan menggunakan kaedah pensampelan rawak sistematik. Seterusnya sampel TK dipilih dari BP yang terpilih juga menggunakan kaedah sama melalui penjanaan nombor rawak dan menetapkan selang pemilihan supaya setiap TK mempunyai kebarangkalian yang sama untuk terpilih. Prosedur ini dilaksanakan secara teratur dan saintifik untuk menghasilkan sampel yang tidak pincang (*unbiased*) dan boleh mewakili keseluruhan populasi isi rumah di Malaysia.

9. SAIZ SAMPEL

- 9.1 Saiz sampel HES 2022 perlu mewakili populasi mengikut keperluan peringkat analisis yang ditetapkan. Saiz sampel ini telah mengambil kira elemen berikut:
- Penemuan daripada survei yang lepas iaitu HES 2019;
 - Reka bentuk pensampelan berperingkat; dan
 - Ralat yang disasarkan.
- 9.2 Prosedur penganggaran saiz sampel dikira di setiap strata daerah pentadbiran dan substrata (bandar dan luar bandar). Pengiraan saiz sampel turut mengambil kira purata perbelanjaan, aras keyakinan pada 95%, ralat piawai relatif, *design effect*, dan kadar respon yang telah ditetapkan.

9.3 Pengiraan saiz sampel bagi sub populasi j , n_{1j} dikira menggunakan formula berikut:

$$n_{1j} = \frac{n_{0j}}{1 + \frac{n_{0j}}{N_j}} \quad ; j = 1, 2, 3, \dots k$$

di mana:

$$n_{0j} = \frac{\sigma^2}{(RSE \times \mu)^2}$$

Bagi memenuhi andaian-andaian dalam Pensampelan Berstrata, maka faktor kesan reka bentuk ($D.E.$) diambil kira:

$$D.E = \frac{\text{varians bagi reka bentuk kompleks}}{\text{varians bagi SRS}}$$

Saiz sampel dengan mengambil kira $D.E.$ bagi sub populasi j , n_{2j} diberikan oleh:

$$n_{2j} = n_{1j} \times D.E.$$

Dan seterusnya, mengambil kira kadar respon penyiasatan lepas, maka saiz sampel keseluruhan bagi sub populasi j , n_3 adalah seperti berikut:

$$n_{3j} = n_{2j} \times \frac{1}{\text{Kadar Respon}}$$

Maka, jumlah saiz sampel, n diberi oleh:

$$n = \sum_{j=1}^k n_{3j}$$

di mana:

- n_{0j} saiz sampel asas yang diperoleh mengambil kira ukuran populasi diketahui (FPC) bagi sub populasi j
- n_{1j} saiz sampel yang mengambil kira faktor populasi bagi sub populasi j
- n_{2j} saiz sampel yang mengambil kira faktor kesan rekabentuk bagi sub populasi j
- n_{3j} saiz sampel yang mengambil kira faktor kadar respon bagi sub populasi j
- N jumlah unit elemen dalam populasi
- n saiz sampel keseluruhan
- σ sisihan piawai
- RSE relative standard error
- μ purata perbelanjaan daripada survei yang lepas

9.4 Agihan saiz sampel HES 2022 adalah seperti berikut:

Negeri	Bilangan BP Terpilih	Bilangan TK Terpilih	Bilangan IR respon
Johor	695	5,560	5,455
Kedah	536	4,288	4,164
Kelantan	420	3,360	3,097
Melaka	214	1,712	1,590
Negeri Sembilan	287	2,296	2,157
Pahang	402	3,216	3,105
Pulau Pinang	440	3,520	3,239
Perak	628	5,024	4,911
Perlis	123	984	942
Selangor	796	6,368	6,234
Terengganu	370	2,960	2,790
Sabah	916	7,328	7,155
Sarawak	1,085	8,680	8,126
W.P. Kuala Lumpur	428	3,424	3,153
W.P. Labuan	61	488	481
W.P. Putrajaya	74	592	545
MALAYSIA	7,475	59,800	57,144

10. PENGANGGARAN

Dalam prosedur penganggaran, pemberat (*non-response weight*) digunakan untuk mengambil kira kes tidak respon. Pemberat asal (*design weight*) disesuaikan dengan mengambil kira kadar tidak respon bagi setiap domain atau strata. Sebagai contoh, sekiranya 5,000 isi rumah terpilih tetapi sebanyak 4,000 isi rumah sahaja yang respon kepada survei maka pemberat asal (*design weight*) akan disesuaikan dengan mengambil kira 20 peratus tidak respon. Sekiranya pemberat asal (*design weight*) adalah 2.0 yang memberi maksud satu sampel isi rumah mewakili dua isi rumah dalam populasi maka pemberat (*non-response weight*) akan menjadi 2.5 yang memberi maksud satu sampel isi rumah mewakili 2.5 isi rumah yang lain.

11. PENILAIAN DATA

Data yang diperoleh daripada survei atau kajian berdasarkan sampel berkebarangkalian tidak boleh dipisahkan daripada dua jenis ralat. Ralat yang dimaksudkan ialah ralat pensampelan dan ralat bukan pensampelan.

i. **Ralat pensampelan**

Ralat pensampelan berpunca daripada anggaran data yang terhasil daripada sampel berkebarangkalian dan boleh diukur dengan mengira Ralat Piawai Relatif, biasanya dinyatakan dalam bentuk peratusan.

Ralat ini digunakan sebagai penunjuk kepada kepersisan anggaran parameter yang dikaji, memberikan gambaran tahap variasi anggaran pembolehubah yang dianggarkan melalui penyiasatan dan parameter populasi.

Sebagai contoh, penemuan HES 2022 mendapati perbelanjaan penggunaan bulanan purata bagi Sabah adalah RM3,342 dengan Ralat Piawai Relatif 1.1 peratus.

Dalam erti kata lain, nilai Ralat Piawai adalah RM36. Berasaskan 95% selang keyakinan ($\alpha=0.05$), perbelanjaan penggunaan isi rumah bulanan purata berada dalam batasan antara RM3,272 - RM3,413 sebulan.

ii. **Ralat bukan pensampelan**

Ralat ini boleh berpunca daripada liputan penyiasatan yang tidak lengkap, kelemahan liputan rangka, ralat dalam maklum balas, tiada respon dan kesilapan semasa peringkat pemprosesan seperti penyuntingan, pengekodan dan tangkapan data. Untuk mengekalkan kualiti data berada pada tahap yang tinggi, pelbagai langkah pentadbiran telah dilaksanakan untuk meminimumkan **ralat bukan pensampelan** berada di tahap minimum. Langkah-langkah ini termasuk latihan intensif kepada penyelia dan penemuramah serta penyeliaan yang rapi dan semakan rawak dijalankan ke atas isi rumah yang diliputi oleh penemuramah untuk memastikan kesahihan maklumat yang direkodkan.

Bagi mengatasi kes tiada respon yang berpunca daripada beberapa sebab seperti TK kosong, tiada penghuni di rumah, enggan bekerjasama atau TK tidak layak diliputi dalam survei, maka penganggaran saiz sampel HES 2022 telah mengambil kira semua kemungkinan tersebut.

Pengemaskinian rangka pensampelan yang dilaksanakan dari semasa ke semasa telah dapat mengurangkan kadar tiada respon yang berpunca daripada TK kosong. Publisiti yang meluas dilaksanakan melalui media elektronik serta media cetak bagi mengurangkan kes tiada penghuni di rumah dan enggan bekerjasama.

Selain daripada itu, di peringkat prosesan data, semakan konsistensi bagi setiap pembolehubah dan proses validasi telah dilaksanakan secara sistematik bagi meminimumkan kesemua ralat bukan pensampelan.

12. LIMITASI ANALISIS

Penemuan HES 2022 mendapati kepersisan anggaran perbelanjaan penggunaan isi rumah bulanan purata mengikut daerah pentadbiran berada pada tahap kebolehpercayaan yang tinggi. Sebagai contoh, perbelanjaan penggunaan isi rumah bulanan purata di daerah Kota Kinabalu adalah RM4,427 dengan Ralat Piawai Relatif 3.3 peratus. Dalam erti kata lain, nilai Ralat Piawai adalah RM145. Berasaskan 95% selang keyakinan ($\alpha=0.05$), perbelanjaan penggunaan isi rumah bulanan purata bagi daerah Kota Kinabalu berada dalam batasan antara RM4,144 - RM4,710 sebulan. Analisis terperinci data perbelanjaan bagi peringkat daerah pentadbiran adalah berdasarkan kebolehpercayaan nilai relatif sehingga tidak melebihi selang toleransi 20 peratus.

13. KADAR PERTUMBUHAN TAHUNAN DIKOMPAUN

Pengiraan kadar pertumbuhan tahunan dikompaun adalah berdasarkan kepada fungsi eksponen seperti berikut:

$$CAGR = \frac{\ln\left(\frac{Y_t}{Y_0}\right)}{t} \times 100$$

di mana,

CAGR kadar pertumbuhan tahunan di kompaun

Y_t perbelanjaan isi rumah bulanan tahun semasa

Y_0 perbelanjaan isi rumah bulanan tahun sebelumnya

t tempoh masa

14. PEMBUNDARAN ANGGARAN

Pengiraan bagi sesuatu kategori mungkin tidak sentiasa sama antara jadual disebabkan oleh pembundaran secara bebas. Walau bagaimanapun, perbezaan ini adalah tidak ketara. Peratusan yang ditunjukkan dalam jadual adalah diperoleh daripada angka sebenar dan tidak semestinya memberikan jumlah genap 100 peratus disebabkan pembundaran, walaupun jumlah yang ditunjukkan adalah 100 peratus.

15. NOTA DAN SIMBOL

0.0 Kurang daripada setengah unit terkecil yang ditunjukkan. Misalnya, kurang daripada 0.05 peratus

- Tiada / kosong / tiada kes

1. INTRODUCTION

The statistics released in this report are findings of the Household Expenditure Survey (HES) 2022 which is conducted by the Department of Statistics Malaysia (DOSM). Starting in 2016, this survey will be carried out twice in five years. This report provides the statistics regarding the expenditures of overall households in Malaysia. These technical notes contain the detailed descriptions to facilitate users with better understanding pertaining of HES 2022.

2. OBJECTIVE OF SURVEY

The main objectives of the survey are as follows:

- i. *To collect information on the level and pattern of consumption expenditure by Households (HH) on varieties of goods and services;*
- ii. *As the basis to determine the types of goods and services to be included in the basket of the CPI; and*
- iii. *To update the CPI weights where the CPI is a measure of the average rate of change in prices of a fixed basket of goods and services which represent the expenditure pattern of all HH in Malaysia.*

3. METHOD OF DATA COLLECTION

- 3.1 *HES uses the personal interview method using the questionnaire form to obtain information from respondents. During the survey period, trained interviewers will visit households in selected Living Quarters (LQs) to collect demographic information on all household members and detailed information on income and expenditure by classification of goods and services.*
- 3.2 *Quality checks were done by experienced officers from the DOSM State office to detect and correct any possibility of errors or omissions at the time when the survey was conducted. The review processes were also implemented for selected HH to ensure the quality of the data collected.*

4. REFERENCE PERIOD

Household expenditure data were collected over two reference periods. The first reference period of one month referred to the daily expenditure incurred by the HH from the first until the last day of the month.

The second reference period was for items of infrequent expenditure, such as consumer durables and selected items, and covered the past 11 months.

For example, if the month of survey is December 2022, then the reference period of HH for one month is calculated from 1st December 2022 until 31st December 2022, while the second reference period is from 1st January 2022 until 30th November 2022.

5. SCOPE AND COVERAGE

- 5.1 *The selection of the sample for this survey has taken into consideration both urban and rural areas in administrative districts for all states in Malaysia.*
- 5.2 *The coverage of the survey is limited to HH living in private LQs only, excluding those who are living in residential institutions such as hostels, hotels, hospitals, old people's homes, prisons, welfare homes, lodging house and workers who live in shared housing.*

6. CONCEPTS AND DEFINITIONS

6.1 Household Expenditure

*The definition of household expenditure used is based on the concepts and guidelines System of National Accounts, 2008 by United Nations and Framework for Statistics on the Distribution of Household Income, Consumption and Wealth, 2013 by Organisation for Economic Co-operation and Development (OECD). This expenditure can be divided into two types, namely **consumption expenditure** and **non-consumption expenditure**.*

i. Household consumption expenditure

Household consumption expenditure is the expenditure for private consumption on goods and services during the reference period. These expenditure include:

- All expenditure either in cash or credit by HH members on goods and services for personal use. This type of expenditure also includes taxes paid for goods and services;
- All goods, services and facilities received in kind, whether free or concession is considered as expenditure. For example, free or concession food and lodging.
- The value from food and lodging is calculated as the expenditure to the respective HH;
- Goods for own consumption. For instance, vegetables taken from own farm or goods from own shop consumed by HH were imputed at retail prices. The imputed prices were regarded as expenditure for the HH; and
- Net rental value of owner-occupied house was also included as expenditure. This rental value has to be imputed referring to the present market value of similar type of house in the same area.

ii. Household non-consumption expenditure

Household non-consumption expenditure refer to the following items:

- Payments made by payers for services that cannot be identified and aimed to increase government revenue;
- Payments that have no direct relation to the acquisition of services received (e.g. membership fees, gifts, gifts to charity donations/religious bodies).

Examples of non-consumption expenditure are:

- i. Income tax and other direct taxes such as zakat, fitrah and road tax;
- ii. Contributions to social security from employers and employees namely EPF and SOCSO;
- iii. Payment of compensation;
- iv. Mandatory fees and fines such as passport fees, driving test fees and fines for traffic offenses;
- v. Giving to charity/religious bodies;
- vi. Club membership fees;

- vii. Extension to other HH;
- viii. Alimony fees; and
- ix. Gift in cash or in kind.

Apart from that, this survey also includes savings, amounts invested or loaned, and repayments of loans including housing loans, gambling losses, cash grants and donations. Even though this is out of the concept of expenditure, this information is part of the survey and need to be covered. The aim is to get a complete HH account record and to assist in gross balancing between revenues and other receipts and expenditures and other payments in the reference period for each HH. This information was also directly giving an overview and the guarantee of high data quality.

The details that are NOT INCLUDED in the HH expenditure are as follows:

- i. Expenses for food, accommodation, travel and entertainment while on duty either for business or government affairs, expenses on uniforms, tools & equipment for work and others which was paid by an employee relating to his employer's business and repaid by the employer; and
- ii. Free services given to the public such as recreational and cultural services at the children's playground and free public parking.

6.2 Measurement of Consumption Expenditure

Three common approaches were used to determine the consumption expenditure namely:

i. Acquisition Approach

Value of purchasing during the acquisition of goods and services without taking into account whether they are fully used or no; or paid in full or not in the reference period. Acquisition was extended to include the estimated value of own production of non-durable goods and services and those given or received as in kind.

ii. Consumption Approach

This approach used at certain condition for durable items that having long period (example: car, other user vehicles and carpentry tools) and use utility such as water and electricity.

iii. Payment Approach

Payments that involve advance payment to obtain goods and services where the goods and services have yet received in the reference month (example: advance payment in purchasing car).

6.3 Classification of Expenditure Item

*Expenditure is classified to 14 main group based on **Classification of Individual Consumption According to Purpose 2018 (COICOP 2018)**, United Nations:*

- 01 *Food and Beverages;*
- 02 *Alcoholic Beverages and Tobacco;*
- 03 *Clothing and Footwear;*
- 04 *Housing, Water, Electricity, Gas and Other Fuels;*
- 05 *Furnishings, Household Equipment and Routine Household Maintenance;*
- 06 *Health;*
- 07 *Transport;*
- 08 *Information and Communication;*
- 09 *Recreation, Sport and Culture;*
- 10 *Education Services;*
- 11 *Restaurants and Accommodation Services;*
- 12 *Insurance and Financial Services;*
- 13 *Personal Care, Social Protection and Miscellaneous Goods and Services; and*
- 90 *Non-Consumption Household Expenditure.*

However, in this publication, items of consumption expenditure include 13 main groups (01 - 13) only.

6.4 Types Of Goods

Classification of household expenditure into 5 categories types of goods as follows:

1 Durable Goods

*Items that have a useful **life** of more than one year and are relatively **high in value**, such as cars, refrigerators and televisions.*

2 Semi-Durable Goods

*Items that have a **shelf life** of approximately one year or relatively **inexpensive**, such as clothing, textiles and gardening tools.*

3 Non-Durable Goods

*Items that have a **short shelf life** and are relatively **inexpensive**. Examples are rice, meat, fish, milk, fruits, vegetables, beverages, petrol and others.*

4 Service

Expenses paid by household on all services such as medical care, entertainment, recreation, culture, education and others provided by the government or the private sector; including spending on food or drinks at restaurants, cafes or hotels.

5 Other Expenses

Payment in the form of transfers such as income tax, security payments, compensation payments, fines, compulsory payments and other household payments. Other payments such as the amount invested or borrowed, loan repayments and additional to savings.

6.5 Living Quarters

*Living quarters are defined as independent and separate structures, which are usually used as place of abode. The terms, **separate** and **independent** mean the following:*

i. Separate

A structure is considered separate if it is surrounded by walls, fence, etc. and is covered by roof.

ii. Independent

A structure is said to be independent if it has direct access via public path, communal passageway or space (that is, occupants can come in or go out of their LQs without passing through others' premises).

6.6 Household

*A person or group of people whether related or unrelated who usually live together in a **living quarters** and make provision (expenses) for food and other necessities of life together.*

6.7 Head of Household

Head of household is defined as any usual members whether male or female which is considered as head by other members. Head of HH must be an income recipient and age 15 years and above.

6.8 Ethnic Group

The ethnic group is categorised within Malaysian citizens after separating those who are non-citizens. The classification is as follows:

- i. *Malaysian citizens*
 - a. *Bumiputera*
 - b. *Chinese*
 - c. *Indians*
 - d. *Others*
- ii. *Non-Malaysian citizens*

7. SAMPLING FRAME

7.1 *The frame used for selecting the sample for HES 2022 was based on the Household Sampling Frame which made up of Enumeration Blocks (EBs) created for the 2020 Population and Housing Census that was updated from time to time. EBs are geographical contiguous areas of land with identifiable boundaries created for survey operation purposes. On average, each EB contains about 80 to 120 Living Quarters (LQs). All EBs are formed within gazetted boundaries within such as administrative districts, mukim or local authority areas.*

- 7.2 The EBs in the sampling frame are classified into urban and rural areas. Urban areas are defined according to the criteria set in the Population and Housing Census of Malaysia 2020. **Urban** areas consist of gazetted areas and their adjoining built-up areas, which have a combined population of 10,000 or more. In contrast, gazetted areas with population less than 10,000 and not gazetted areas are classified as **rural** areas.
- 7.3 Built-up areas are regions adjacent to gazetted areas and have at least 60 percent of their population (aged 15 years and over) engaged in non-agricultural activities.
- 7.4 The definition of urban areas also takes into account special development areas, which are development areas that are not gazetted and can be identified and separated from gazetted areas or areas with built-up areas exceeding five kilometers and having a population of at least 10,000 people with 60 percent of the population (aged 15 years and over), who are involved in non-agricultural activities.
- 7.5 Urbanisation is a dynamic process that is constantly evolves with progress and development. Consequently, the urban areas identified in 2010 and 2020 Censuses may not necessarily refer to the same locations, as areas meeting the urban criteria will continue to expand and develop over time.
- 7.6
- | Strata | Population of gazetted, adjoining built-up areas and special development area |
|---------------|--|
| Metropolitan | 75,000 and above |
| Urban large | 10,000 to 74,999 |
| Urban small | 1,000 to 9,999 |
| Rural | All other areas |

The classification of area by strata is as follows:

- 7.7 For sampling purposes, classification of areas in point 7.6 is used for all states and Federal Territories. For Sabah and Sarawak, given the problem of difficulty in accessing the interior, the rural strata were further developed based on the length of time it took to reach a place from the nearest urban center.
- 7.8 For purposes of tabulating the report, the strata are listed as follows:

$$\text{Urban} = \text{Metropolitan} + \text{Urban large}$$

$$\text{Rural} = \text{Urban small} + \text{All rural}$$

8. SAMPLE DESIGN

- 8.1 A two-stage stratified sampling design was used in HES 2022. The formation of the strata is as follows:

Primary strata	Covered all states in Malaysia
Secondary strata	Covered administrative districts for all states in Malaysia
Tertiary strata	Covered urban and rural strata as stated in point 7.8

- 8.2 Sample selection is performed at the Enumeration Block (EB) stage using the systematic random sampling method. Next, the Living Quarters (LQ) sample is selected from the selected EBs using the same method, generating random numbers and setting the selection interval to ensure equal probability of selection for each LQ. This systematic and scientific procedure is carried out to generate an unbiased sample that can represent the entire population of households in Malaysia.

9. SAMPLE SIZE

- 9.1 The sample size of HES 2022 needs to represent the population according to the requirements of the analysis level set. This sample size has taken into account the following elements:

- i) Findings from the previous survey HES 2019;
- ii) Sampling design; and
- iii) Margin of error.

- 9.2 Estimated sample size is calculated within each stratum (administrative districts) and substratum (urban and rural). The sample size calculation takes into account the average expenditure, a 95% confidence level, relative standard error, design effect and specified response rate.

9.3 Sample size calculation for subpopulation j , n_{1j} is calculated using the following formula:

$$n_{1j} = \frac{n_{0j}}{1 + \frac{n_{0j}}{N_j}} \quad ; j = 1, 2, 3, \dots k$$

where:

$$n_{0j} = \frac{\sigma^2}{(RSE \times \mu)^2}$$

To meet the assumptions in Stratified Sampling, the design effect factor (D.E.) is taken into account:

$$D.E. = \frac{\text{variance for complex sample}}{\text{variance for SRS}}$$

Sample size considering D.E. for subpopulation j , n_{2j} is given by:

$$n_{2j} = n_{1j} \times D.E.$$

and then, taking into account the response rate of the last survey, the overall sample size for sub-population j , n_3 is as follows:

$$n_{3j} = n_{2j} \times \frac{1}{\text{Response Rate}}$$

So, the total sample size, n is given by:

$$n = \sum_{j=1}^k n_{3j}$$

where:

- n_{0j} the basic sample size obtained consider the Finite Population Factor (FPC) for subpopulation j
- n_{1j} sample size taking into account the population factors for the sub population j
- n_{2j} sample size taking into account the design effect factors for subpopulation j
- n_{3j} sample size taking into account the response rate factors for the subpopulation j
- N the number of element units in the population
- n total sample size
- σ standard deviation
- RSE relative standard error
- μ average expenditure from previous survey

9.4 The sample size for HES 2022 is as follows:

State	Number of selected EBs	Number of selected LQs	Number of HH response
Johor	695	5,560	5,455
Kedah	536	4,288	4,164
Kelantan	420	3,360	3,097
Melaka	214	1,712	1,590
Negeri Sembilan	287	2,296	2,157
Pahang	402	3,216	3,105
Pulau Pinang	440	3,520	3,239
Perak	628	5,024	4,911
Perlis	123	984	942
Selangor	796	6,368	6,234
Terengganu	370	2,960	2,790
Sabah	916	7,328	7,155
Sarawak	1,085	8,680	8,126
W.P. Kuala Lumpur	428	3,424	3,153
W.P. Labuan	61	488	481
W.P. Putrajaya	74	592	545
MALAYSIA	7,475	59,800	57,144

10. ESTIMATION

In the estimation procedure, a weight (non-response weight) is used to account non-response cases. The original weight (design weight) is adjusted by considering non-response rate for each domain or stratum. For example, if 5,000 households are selected but only 4,000 households respond to the survey, the original weight (design weight) will be adjusted to account for a 20 percent non-response rate. If the original weight (design weight) is 2.0, meaning that one household sample represents two households in the population, then the weight (non-response weight) will be adjusted to 2.5, indicating one household sample represents 2.5 other households.

11. DATA EVALUATION

The data obtained from the surveys conducted using a probability sample is subject to two types, namely sampling and non-sampling error.

i. Sampling Error

Sampling error arises from estimating data obtained from a probability sample can be assessed by calculating the Relative Standard Error, typically expressed as a percentage.

This error serves as an indicator of the accuracy of the estimated parameters under investigation, providing insight into the level of variation between the variables estimated through the survey and the population parameter.

For example, findings from the HES 2022, revealed that the mean monthly household consumption expenditure for Sabah is RM3,342 with a Relative Standard Error of 1.1 per cent. In other words, the Standard Error value is RM36. Based on a 95% confidence interval ($a=0.05$), the mean monthly household consumption expenditure falls within the range of RM3,272 - RM3,413 per month.

ii. Non-sampling Error

*These errors can arise due to incomplete survey coverage, weaknesses in the survey framework, errors in feedback, non-responses, and mistakes during processing stages such as editing, coding and data capture. To maintain a high level of the data quality, various administrative measures have been implemented to minimize **non-sampling error**. These measure include intensive training provided to supervisors and interviewers as well as close supervision and random checks conducted on households covered by the enumerators to ensure the accuracy and validity of the recorded information.*

To overcome cases of error no response resulting from several reasons such as empty LQ, 'no resident at home', refusal to cooperate or LQ not eligible to be covered in the survey, the sample size estimation of HES 2022 has taken into account all these possibilities.

The updating of the sampling frame implemented from time to time has been able to reduce the non-response rate caused by empty LQ. Extensive publicity is carried out through electronic media and print media to reduce cases of no residents at home and refusing to cooperate.

In addition, at the data processing stage, consistency checks for each variable and validation processes have been systematically implemented to minimize all non-sampling errors.

12. LIMITATION ANALYSIS

The findings of HES 2022 found that the precision of the mean monthly household consumption expenditure by administrative district possesses a high degree of reliability level. For example, the mean monthly household consumption expenditure in Kota Kinabalu is RM4,427 with a relative standard error of 3.3 per cent. In other words, the standard error is RM145. Based on the 95% confidence interval ($\alpha=0.05$), the mean monthly household consumption expenditure of Kota Kinabalu district is within the range of RM4,144 - RM4,710 per month. Detailed analysis of expenditure data by administrative district level is based on the relative value reliability of not more than 20 per cent tolerance interval.

13. COMPOUNDED ANNUAL GROWTH RATE

Calculation of the compounded annual growth rate based on the exponent function as follows:

$$CAGR = \frac{\ln\left(\frac{Y_t}{Y_0}\right)}{t} \times 100$$

where,

CAGR compounded annual growth rate

Y_t current year household monthly expenditure

Y_0 previous year household monthly expenditure

t period

14. ROUNDING OF ESTIMATES

The calculation of certain categories may not always be the same between tables due to independent rounding. However, the differences were insignificant. Percentages shown in the tables were computed from actual absolute figures and may not always add up exactly to 100 per cent due to rounding, although the totals were shown as 100 per cent.

15. NOTES AND SYMBOLS

- 0.0 Less than half the smallest unit shown. For example, less than 0.05 per cent
- Nil / blank / no case
- W.P. Wilayah Persekutuan
- RM Ringgit Malaysia
- n.a Not applicable
- n.e.c Not elsewhere classified
- n.s Not significant
